AUDIO SOLUTIONS

Do you need a sound project?

Contact us and we will help you make it happen.

EGi Audio Solutions is a Spanish and European manufacturer that offers audio solutions for all types of spaces. Our aim is to present our clients with customised audio solutions for each project.

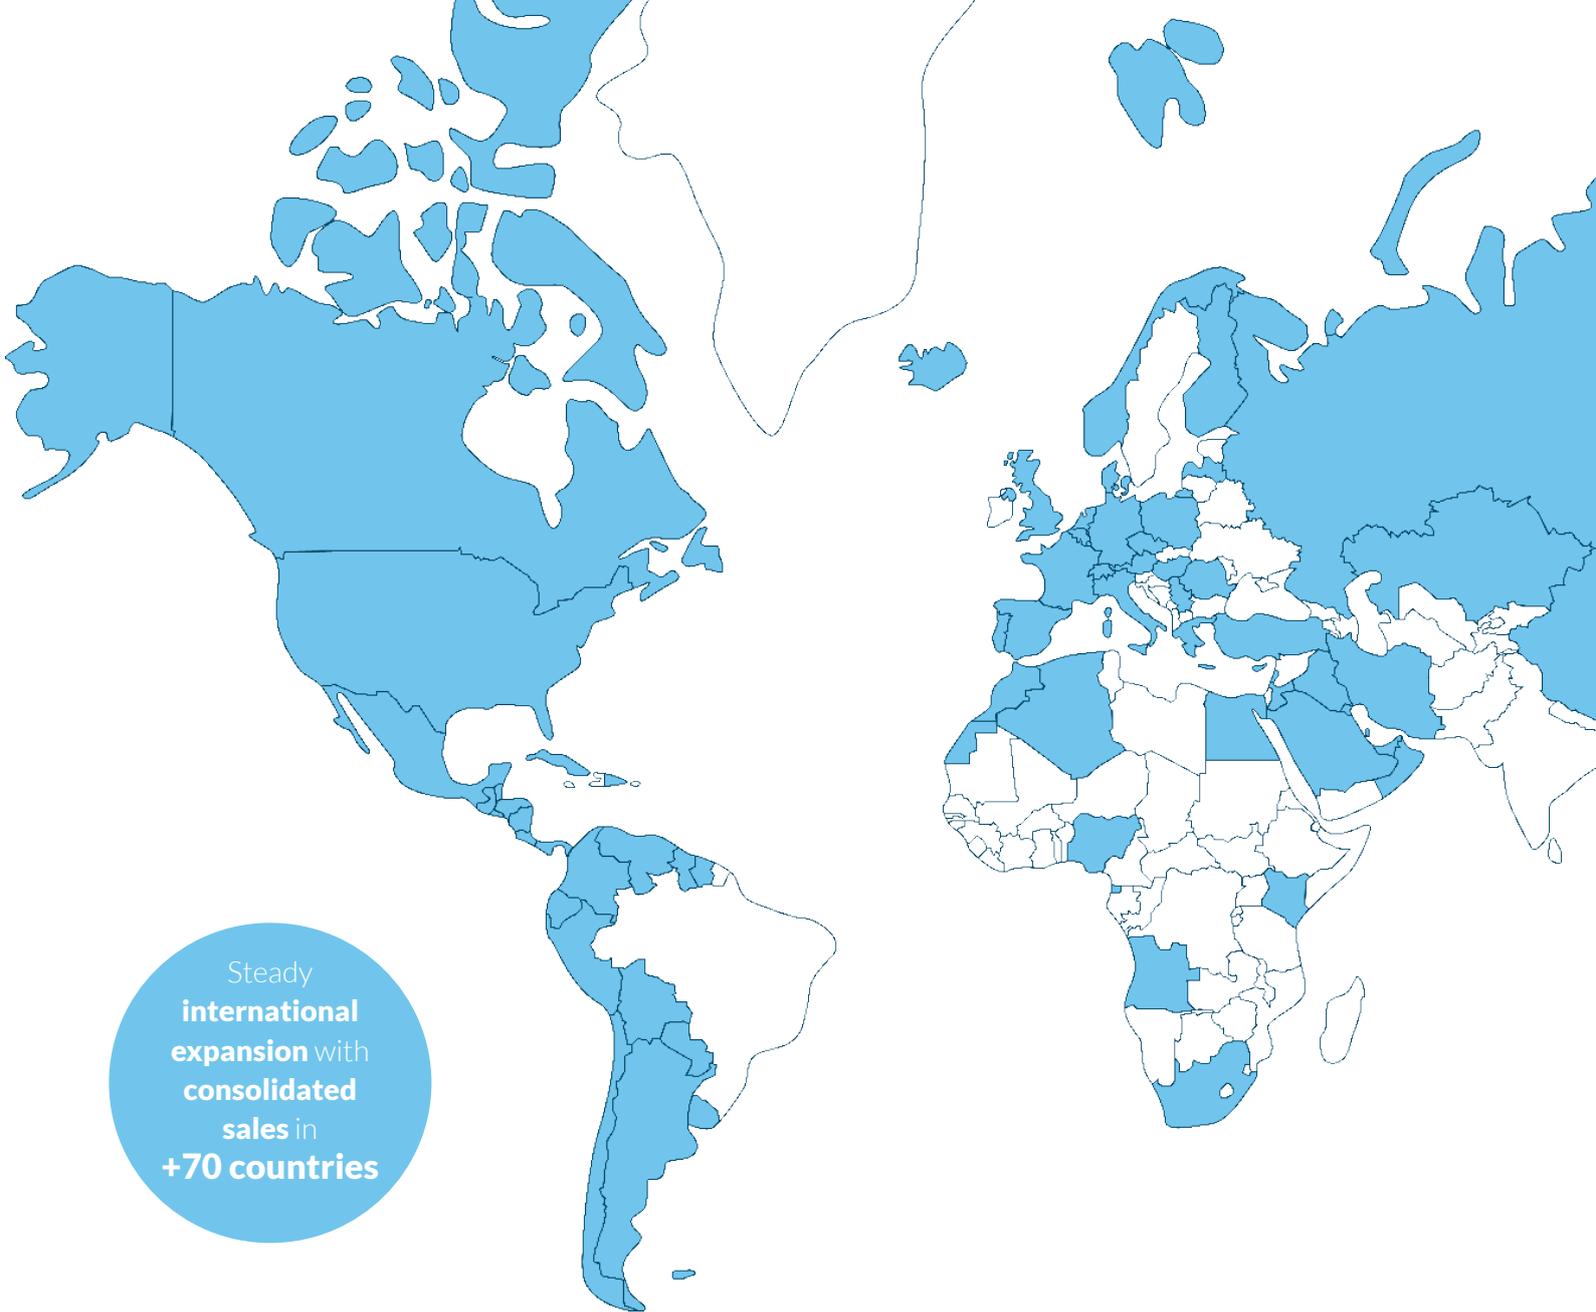

The EGi team specialises in providing audio solutions for hotels, hospitals, residences, homes, factories, supermarkets, shopping centres, schools, auditoriums, sports centres, retail, bars and restaurants, etc... Our technical department works closely with clients to meet the specifications and needs of each project.

We are committed to providing our customers with the audio solution they need using our innovative and high quality products manufactured entirely in our factory in Zaragoza, Spain.

- Tailor-made projects.
- Complete solution for all rooms.
- The best sound quality at a competitive price.
- Personalised attention during all stages of the project.
- Extensive product catalogue.
- More than 40 years of experience.

solutions **to your needs.**

AUDIO SOLUTIONS

WHO ARE WE?

We are one of the Spanish **leading manufacturers** in audio solutions:

PA systems, Bluetooth modules and IP audio, for the audio-ization of all types of infrastructures (residential and nonresidential buildings, car parks, tunnels, etc.), providing a solution **adapted to each client**. After more than 40 years, we remain **committed to innovation, training and growth, always guaranteeing the best quality of our products and services**.

Headquartered in Zaragoza, we have a **wide commercial network** at national level, with branches in Madrid and Barcelona, and at international level, reaching every corner of America, the Middle East, Europe, Asia and Australia. In this way **we can offer the best service to each of our customers**.

We have a dedicated **customer service and technical commercial support team** to advise on projects and help the customer choose the most suitable audio solution for each installation.

We are **ISO 9001:2015 certified**, which certifies our **quality management** system. The scope of this approval applies to the design, manufacture and after-sales service of electronic ambient sound and public address equipment for domestic, commercial, industrial and public installations.

In addition, EGi Audio Solutions has received the PILOT Award for Logistics Excellence from the Aragonese Development Institute and the Award for the Best Telecommunications Company from the Government of Aragon, among others.

Headquarters and factory, Zaragoza (Spain)

NEW LAUNCHES

58001

ACCESSIBLE TOILETS AND CLOTHING ROOMS KIT

This kit consists of:

- 5201: Wall connection box, cord and two red 5702 handles.
- 5507: Master control module and power supply.
- 5212: Signalling module with light buzzer over door.

Complies with CTE-DB SUA (section SUA 3), as it is compulsory to install a call system that can be activated from seat/toilet/floor, with acoustic and visual indication.

42001 / 42002

MULTIROOM IP

- Amplifiers with internal processor for up to 8 zones.
- Multi-voltage switched-mode power supply, class D digital electronic amplification with maximum performance.
- Inputs for Domos2 or Millennium PRO signals with PIN activation.
- LINE IN line signal input for CD, mixers, PCs, tablets, mobile phones or other sound sources with 0.5 V sensitivities.
- 2 USB sockets for memory sticks and WiFi dongles.

Más información en: Página 19

06818 / 06819

BAFLE HIFI MINUET

- High-quality hi-fi speaker for wall and ceiling mounting or can be used as a desktop, desk or bookshelf speaker.
- Rear Bass-Reflex bass output hidden for extra bass boost.
- Minimalist design and surprising sound concept.
- With optional accessory bracket for wall or ceiling mounting.
- Can be connected directly to EGi controls or power amplifiers.
- Wood finish. Black color.
- Available in **low impedance** version (8 Ω) -06818- or **100 V line** -06819-.

More information about Bafle HiFi Minuet IP-1604-: page 25

PLAY & SOUND

SIMPLE INSTALLATIONS

Hotels | Retail | Residential | Offices

Thanks to Play & Sound solutions, you can **connect your multimedia devices** to enjoy music or watch a film at any time and in exceptional sound quality.

KITS

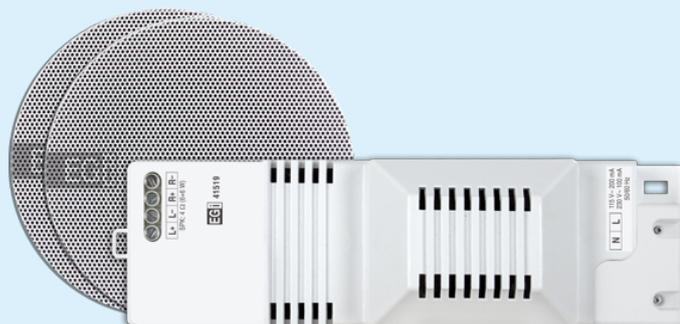

41020

WALL RADIO BLUETOOTH

What is the Bluetooth Wall Radio Kit?

- Consisting of controls 41513 and 41518.
- FM RDS radio.
- USB, mp3, AUX via 3.5 mm jack and Bluetooth inputs.
- Headphone output.
- 2+2 W speaker output.

More information: page 8.

41021

BLUETOOTH AMPLIFIER MODULE + 2 LOUDSPEAKERS 3"

What does the 41021 Kit consist of?

Consisting of a concealed bluetooth ballast -41519- and 2 loudspeakers HQ-06078- (3", 4 Ω, 6+6 W).

More information:
Page 8 - ballast.
Page 60 - loudspeakers.

PLAY & SOUND

MODULES AND CONTROLS

41513
Stereo Wall Radio with FM RDS.

Universal 60x60 mm multi-voltage 230 to 110 V~, with 2+2 W RMS, FM RDS radio, presets and memories via favourites, Clock, Alarm and possibility of Bluetooth with external audio input, MP3 and WAV player via USB socket and headphone output by adding module 41518.

41518
Bluetooth auxiliary module.

Built-in Bluetooth module with friendly name and PIN code, factory set and modifiable. Auxiliary input via 3.5 mm jack and USB, allowing any type of music source to be connected. The headphone output allows you to connect external headphones in stereo, automatically disconnecting the speakers. Unique operation together with Wall Radio 41513.

41519
Concealed Bluetooth amplifier, ceiling mounted.

Multi-voltage Bluetooth amplifier 115/230 V~, 50/60 Hz, 6+6 W at 4 Ω, high efficiency with switched-mode power supply. Easy ceiling mounting. PIN activation for auxiliary power amplifiers via GND cable. Friendly Name and PIN code can be customised on request.

	41513	41514	41517	41518	41519
Power supply	115 / 230 V~ 50 / 60 Hz	3 x 1,5 V AAA batteries	115 / 230 V~ 50 / 60 Hz	From module 41513	115 / 230 V~ 50 / 60 Hz
Stand-by consumption	0,2 W (0,6 W with control 41518)	-	0,3 W	0,2 W	0,3 W
Maximum consumption	143 mA (115 V~) 60 mA (230 V~)	-	200 mA (115 V~) 100 mA (230 V~)	175 mA	200 mA (115 V~) 100 mA (230 V~)
Minimum impedance	16 + 16 Ω	-	4 + 4 Ω (min.)	-	4 + 4 Ω (min.)
Maximum power	2 + 2 W RMS audio	-	6+6 W RMS	-	6+6 W RMS
Placement	Ø 60 mm box	Wall bracket	On the ceiling	Ø 60 mm box	On the ceiling
Color / Finish	Black	Aluminum and black	White	Black	White

PLAY & SOUND

FOR HOTELS

03002.16 / 03002.16NE

Low impedance attenuator for 6 W / 16 Ω loudspeakers.

Resistive attenuator for low impedance loudspeaker lines 6 W RMS power and 16 Ω minimum loudspeakers. Its maximum musical power could support 15 W max, provided it is not used for sine waves or microphones. With 12-step fader, from 0 to maximum in 3 dB steps (± 1 dB).

05015H / 05024H

Bluetooth module, USB charger and HDMI Full HD female-female.

Wall module with socket, combinable with adaptations to other mechanisms. Bluetooth connection via rear audio line output, HDMI female-female prepared for 1080 Full HD signals, USB charger 5 Vdc, 1 A and manual pairing button.

05022H / 05023H

Full HD female-to-female HDMI module and USB charger.

Wall module with socket, combinable with adaptations to other mechanisms. HDMI female-to-female connection prepared for 1080 Full HD digital signals, DTS sound, Dolby Digital stereo and USB charger 5 Vdc, 1 A.

05029H

HDMI cable male-male 4m.

05030H

HDMI cable male-male 10m.

PLAY & SOUND

FOR HOTELS

1210.10H / 41515H Bluetooth AUX/TV remote control with PIN input 2+2 W, 230/115 V~.

Bluetooth wall control, 115/230 V~ powered, 2+2 W RMS. With auxiliary input for TV and multimedia via power strip and front stereo jack input. Volume control and options via buttons. Input sensitivity to 500 mV and PIN input for priority alerts.

1210.10HM / 41515H.M Mando Bluetooth AUX/TV con entrada PIN 2+2 W, MONO, 230/115 V~.

1210.15 / 41515.15 Bluetooth + AUX/TV 2+2 W control at 15Vdc with PIN messages.

Bluetooth wall control. Audio output 2+2W at 16 Ω with auxiliary input for TV and multimedia via power strip and via front 3.5 mm stereo jack input. Powered at 15 Vdc. Final volume control and control of options via front keys. Input sensitivity to 500 mV, and PIN input for priority alerts.

1210.15M / 41515.15M Mando Bluetooth AUX/TV con entrada PIN 2+2 W, en MONO a 15 Vdc.

1210.PreOut Bluetooth + AUX/TV PreOut 115-230V~ control with PIN messages.

Mando de pared Bluetooth, alimentado a 115-230 Vac con salida de previo Line Out de 500 mV estéreo. Con entrada auxiliar para TV y multimedia a través de regleta y entrada frontal de jack estéreo. Control de volumen y opciones mediante botones. Sensitivity de entrada a 500 mV y entrada PIN para avisos con prioridad.

1210.BTH / 41515.BTH Bluetooth control and PIN-priority input for messages, 115/230V~.

Wall control with Bluetooth audio input, within the Hotels and P&S range, powered at 115/230 V~, 2+2 W RMS stereo, with final volume regulation and control of options by means of front keys. PIN input via rear terminal strip for PIN-priority announcements.

EXAMPLES OF ROOM FACILITIES

Example 1

Concealed Bluetooth® module with customisation and lumen control. The combination can be with one speaker in the room and one in the bathroom, as shown in the example, or only in the room.

Guests can connect and play their own music.

Kit - Ref. 41021

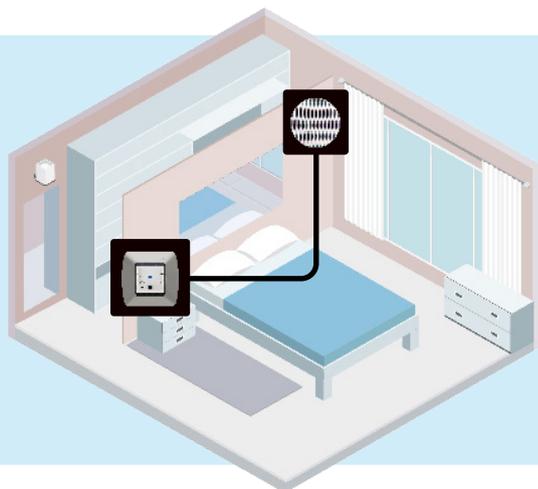

Example 2

general music channels are available, selectable from the same remote control. Guests can turn the volume up and down as they wish. However, the maximum volume can be limited from the reception console and individual alerts can be given to the room or a group of rooms.

A loudspeaker in the bathroom could be added to this combination.

Remote control - Ref. 1207.10 | Loudspeaker - Ref. 06043

PLAY & SOUND

Example 3

Bluetooth® wall module with customisable AUX input. Guests can connect and play their own music via Bluetooth® or AUX input, as well as turn the volume up and down as they wish.

From the reception console it is possible to give alerts to individual rooms or to a group of rooms.

This option can have speakers in the room, as shown, or one in the bedroom and one in the bathroom..

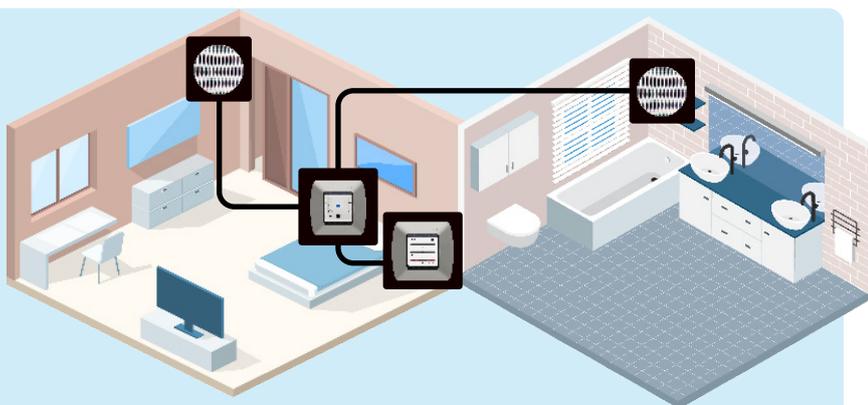

Module - Ref. 1210.10H | Loudspeaker - Ref. 06047

Example 4

Bluetooth® wall module with personalisable AUX input and TV for Millennium customisations. The 3 general music and Bluetooth® channels are selectable from the same remote control. The guest can turn the volume up and down as desired. However, the volume can be limited from the reception console and warnings can be given to individual or a group of rooms.

This combination can have loudspeakers for the room only.

Module - Ref. 1210.10H | Loudspeaker - Ref. 06047 | Control - Ref. 1207.10

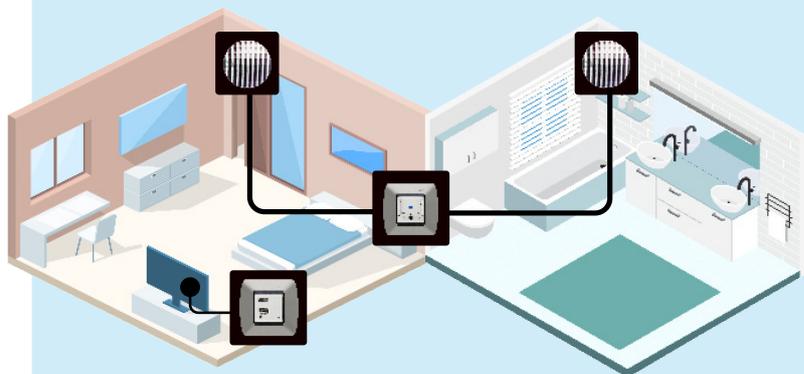

Example 5

Combination of example 3 with a FULL HD female-to-female HDMI module and a USB charger.

Guests can play their own music in the room, via Bluetooth® or AUX input, as well as charge an electronic device via USB or connect from their computer to the TV with an HDMI cable.

This combination can have loudspeakers only in the room.

Module - Ref. 1210.10H | Module - Ref. 05023H | Loudspeaker - Ref. 06047

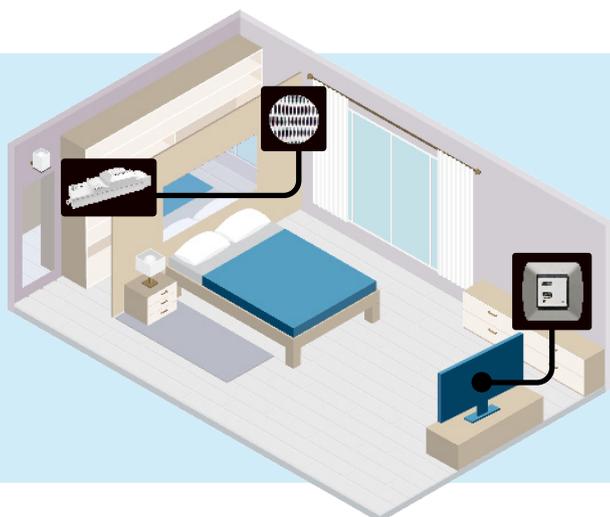

Example 6

Combination of a concealed Bluetooth® module with customisability and volume control, with a FULL HD female-to-female HDMI module and a USB charger.

Guests can play their own music in the room via Bluetooth®, as well as turn the volume up and down, charge an electronic device via USB or connect from their computer to the TV with an HDMI cable.

A loudspeaker in the bathroom could be added to this combination.

Module - Ref. 41519 | Module - Ref. 05023H | Loudspeaker - Ref. 06078 | Kit - Ref. 41021

DOMOS2

HOME AUDIO SOLUTIONS

Residential | Household control

DOMOS2 offers individual and general Hi-Fi stereo sound for each room, intercommunication and the ability to manage all home automation elements.

40292.10

Audio controller, 3+1 channels, loudness and PIN messages.

40291.BT

Bluetooth audio remote control with intercommunication.

DOMOS2

CENTRALES Y MINICENTRALES

40010
Central 1 audio programme + IR.

General audio programme via RCA stereo audio input.

40020
Central 1 audio/FM + IR programme.

1 general audio programme, with FM tuner and RCA stereo audio input, switchable between them. Switching between 9 memories of the control unit's radio tuner and the different audio programmes common to the whole installation. Automatic or manual station search of the control unit's radio stations. Clock displaying the common time for the whole house on the controls (time setting in local mode from the controls).

40070
Minicentral 1 audio programme + IR.

1 audio programme via RCA stereo input. Signal output to go to the centre of external music sources (40120, 40110).

40200
Minicentral audio mp3 via USB stick.

Listen to audio in MP3 format on your installation. Simply insert any USB mass storage module into the Mini Central's connector and playback will start automatically. Occupies 1 general channel of the installation. Compatible with some player models such as Creative® or Ipod®. Black colour.

ACCESSORIES FOR POWER PLANTS

40100

LCD touch remote control for remote control 40291.

40810

Aluminium trim for V11F enclosures.

V11F

Flush box.

W11F

Surface box.

CONTROL COMMANDS

40140V

Audio input module + headphone output.

Balanced audio input module for adaptation to the digital audio outputs from the 40291 control unit. Compatible with other remotes. It has a 3.5 mm stereo jack auxiliary input; and a switchable audio output with the speakers, for stereo headphones via 3.5 mm jack.

40290

DIN rail audio remote control with KNX control and without display.

1+1W Audio and Domotic stereo remote control in DIN Rail format, with audio and home automation functions, to be remotely controlled through the KNX interface ref. 40580. Connection through the usual DOMOS2 general line 10-wire cable. It does not have LCD screen or keys, as it is used to close in cabinets and is controlled from KNX communication protocol.

40291 / 40291.10

Audio remote control with intercom, graphic display, IR and FM RDS. Black / White.

2+2W stereo audio and home automation controller, with easy-to-use blue multipoint graphic display, 6 keys, FM with local RDS, 9 local presets, operation via IR remote control and intercom. With home automation features and KNX home automation control.

40291.BT / 40291.BT10

Bluetooth audio remote control with intercom, 3 channels, with graphic display, FM RDS. Black / White.

Mando de audio y domotico estéreo de 2+2 W, con pantalla grafica multipunto azul de fácil manejo, 6 teclas, FM con RDS local, 9 presintonías locales, manejo a través de mando a distancia por IR y con intercomunicación.

40292 / 40292.10

Audio control 3+1 channels, St/Mono 2+2W, loudness and PIN messages. Black / White.

3Chs + 1 Audio Remote Control with priority or PIN announcements at 15 Vdc stereo/mono 2+2 W in universal box format, with audio and announcements functions, to be compatible with the 3000, DOMOS, DOMOS2, Compact, Millennium and Millennium IP series. Connection via the usual DOMOS2 9-10 wire general line wiring. It has a TOUCH keypad without keys for greater convenience.

CONTROL REMOTES

J12U

Intercom 15 zones + general call. Black.

Interface for general call or independent communication up to 15 rooms or zones. Digital zone selector to talk. Specific push button for general call. Listening volume adjustment. Surveillance, listening and do not disturb functions if there is a central unit with radio C16F or C18F. Luminous symbols. Wired connection. Allows intercom installations without central unit and only with K12G/IN.

Power supply	15 Vdc
Maximum consumption	140 mA
Power Output	0,12 + 0,12 W
Audio output	16 + 16 Ω
Placement	Ø 60 mm box
Color / Finish	Black

CABLES AND ACCESSORIES

0501

3.5 mm stereo male to 2 RCA stereo jack cable (1.5 m).

0502

2 RCA male angled to 2 RCA male stereo cable (1.5 m).

0503

Cable from 3.5 mm stereo jack plug to 3.5 mm stereo jack plug (2 m).

40180

10-conductor stranded cable (100 m) for Domos 2. 750 V.

40181

Cable (100 m) 10-conductor Domos2 with sheath 750 V.

40750

Parallel speaker cable (100 m) 2x0.75 mm².

GENERAL POWER SUPPLIES

03034

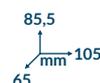

AC/DC 230-115 Vac to 15V/1.58A dc power adapter with Universal plug.

40740

Multi-voltage switch-mode power supply 115/230 V~ 50/60 Hz at 15 Vdc 52 W.

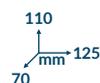

Multi-voltage switch-mode power supply 115/230 V~ at 15 Vdc with 52 W. With power-on indicator and short-circuit or temperature protection indicator. Allows the installation of EGi audio equipment in DIN rail format, with only 6 pcs width. With perfect stabilisation system for audio and home automation. Line connection by means of plug-in and screw-on terminal strip included in each module.

K12G/IN

Auxiliary power supply 15 V, 1.5 A for stand-alone J12U intercom installations.

For stand-alone J12U intercom installations.

	03034	40740	K12G/IN
Power supply	115/230V~	115/230V~ 50/60Hz	230V~

Potencia	24 W	52 W	18 W
Voltaje de salida	15 Vdc	15 Vdc	15 Vdc
Placement	-	DIN Rail (6 u)	DIN rail (6 u)
Color / Finish	Black	Aluminum	Black

DOMOS2

SCHEME

Below is an example of what a Domos2 installation would look like in a home. By connecting the 40200 and 40291.BT controls, we can listen to the radio and music via Bluetooth through the speakers.

In addition, the controls have an intercom function, allowing you to communicate with other areas of the house.

MULTIROOM IP

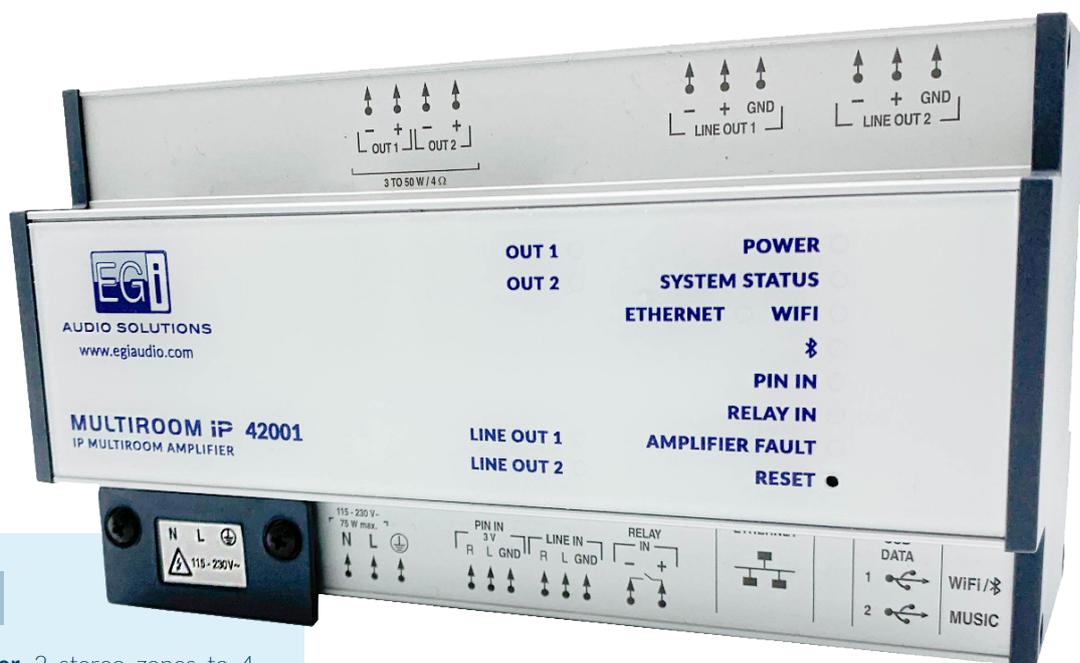

FLEXIBLE SOUND SYSTEMS

Residential | Retail

Multiroom IP is the audio solution that allows music to be played in several rooms of a house or building simultaneously and controlled from one or several mobile devices such as smartphones or tablets.

It allows you to connect high quality speakers that provide a surround audio experience and you can enjoy the same music in all rooms or select different music for each zone.

Ideal for those who want to enjoy the best sound and the freedom to move from one room to another in a home or business without interruptions with the right volume for each zone.

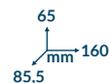

42001

Multiroom IP amplifier, 2 stereo zones to 4 mono zones, DIN rail.

MULTIROOM IP

42001 Multiroom IP amplifier, 2 zones stereo to 4 zones mono, DIN rail.

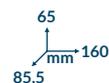

Multiroom IP amplifier with internal processor for 2 stereo zones or 4 configurable mono zones. It has a multi-voltage switched-mode power supply, class D digital electronic amplification with maximum performance. Inputs for Domos2 or Millennium PRO with pin-type activation, as well as Line IN line signal input for CD, mixing consoles, PCs, tablets, mobile phones or other sound sources with 0.5 V sensitivities.

It also has activation via Relay IN contact input, 2 USB sockets for memories and for WiFi dongles and 2 amplified outputs for 1 stereo zone or 2 mono zones.

Some of the features offered are: Spotify Connect, internet radio, USB, AUX, WiFi and Ethernet connections, among others.

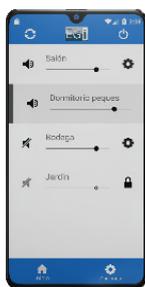

42002 Multiroom IP amplifier, 4 stereo zones to 8 mono zones, DIN rail.

Multiroom IP amplifier with internal processor for 4 stereo zones or 8 mono zones, configurable. It has a multi-voltage switched-mode power supply, class D digital electronic amplification with maximum performance, inputs for Domos2 or Millennium PRO pin signals with pin-type activation, as well as Line IN line signal input for CD, mixing consoles, PCs, tablets, mobiles or other sound sources with 0.5 V sensitivities.

It also has activation via Relay IN contact input, 2 USB sockets for memory sticks and WiFi dongles and 8 amplified outputs for 8 zones. It can be configured from 4 stereo zones to a maximum of 8 mono zones, which can be combined.

Some of the features offered are: Spotify Connect, internet radio, USB, AUX, connections via WiFi and ethernet, among others.

42801 Multiroom IP APP for zone control via tablets and mobile phones.

Software APP for installation on smartphones or tablets, both Android and iOS, to control one or multiple zones, as long as the zones are visible on the same LAN Ethernet WiFi network as the installed mobile or device.

Line outputs	2	0
Speaker outputs	2	8
Placement	9 pcs. DIN rail	9 pcs. DIN rail
Color / Finish	Aluminium	Aluminium

Example 1 - Bar-restaurant installation.

In this example we find a bar-restaurant where there are 2 areas. A bar and cafeteria area and a restaurant area. Both rooms have different sound, but they can be combined with our system.

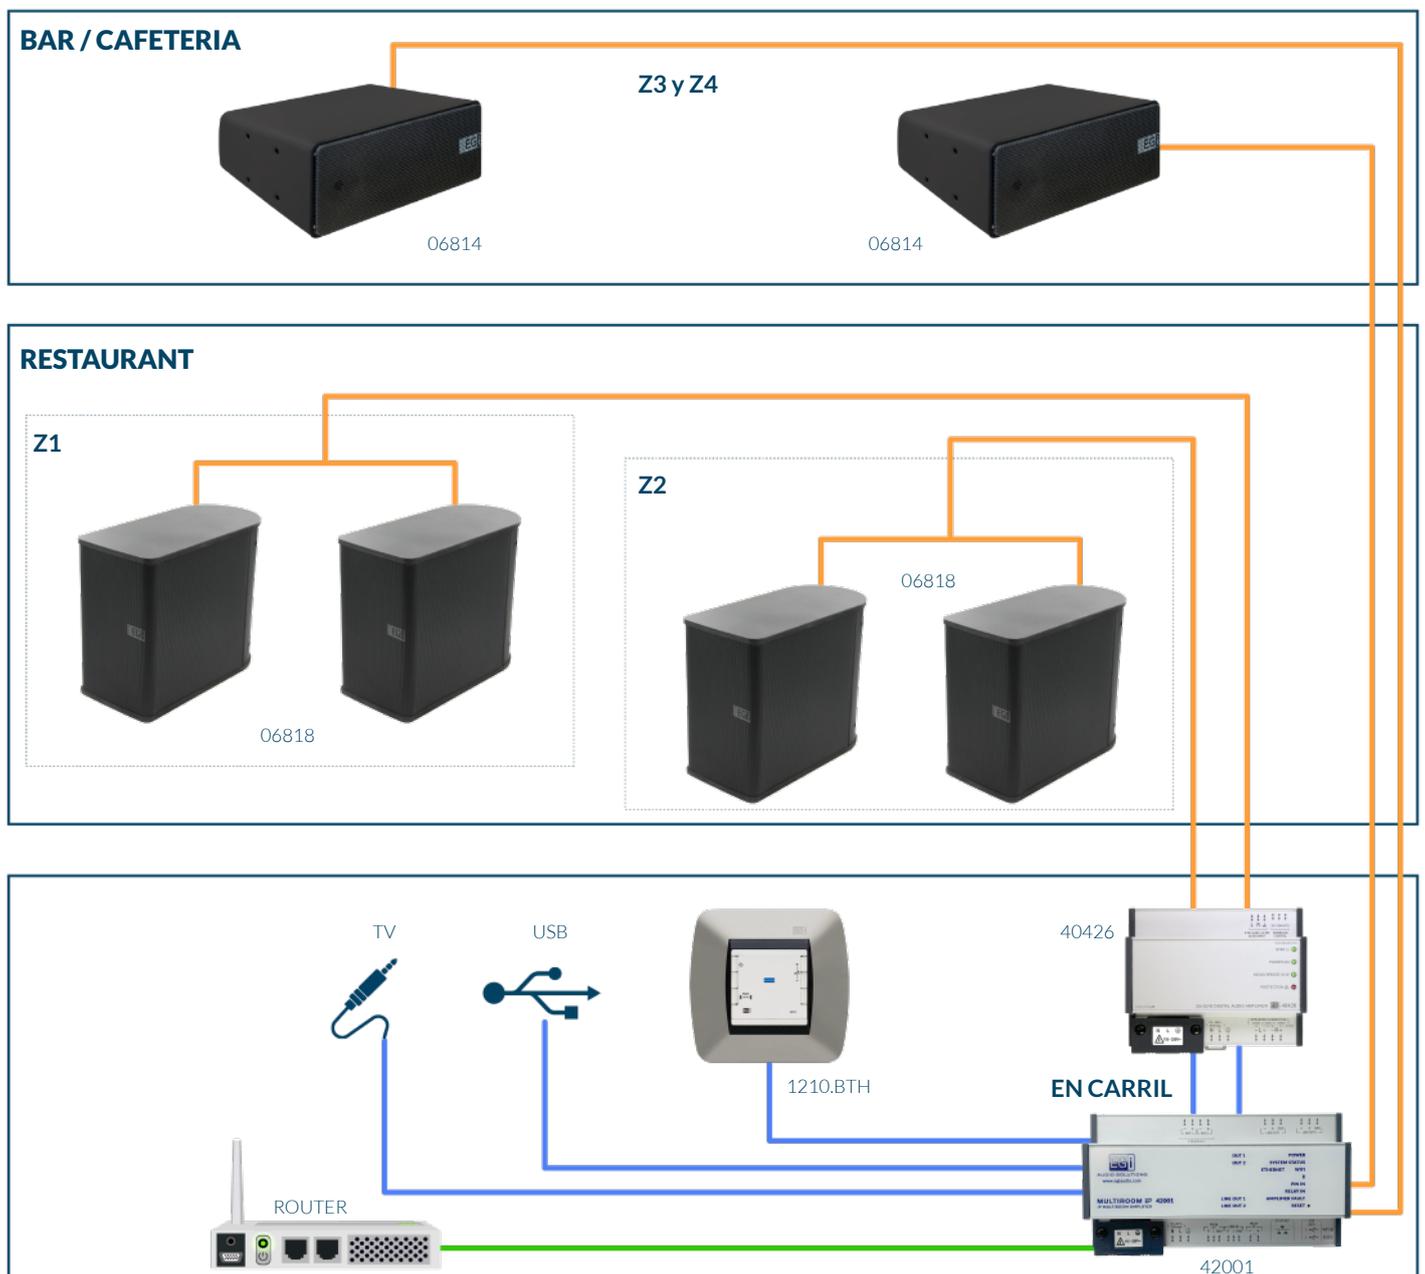

In both of them we have opted for stereo sound, as sound quality is usually very important in this type of establishment.

Outputs 1 and 2 have been configured as zone 1 in stereo with 2 x 25 W and are for the bar and cafeteria with 2 Line Array 06814.

On the other hand, as restaurants usually require high quality but at low volume, outputs 3 and 4 have been configured as zone 2 in

stereo, but as it is a balanced or unbalanced line output, in order to be able to put the models of stages we want, our 40426 stage has been placed to give sound to 4 Minuet 06818 baffles of low impedance (8 ohms). The total is also as in the bar, 2 x 25 W per box, i.e. about 13 W per Minuet baffle.

At the same time, the TV output is connected to the Line IN input, so that you can listen to the TV in any area at any time, a Bluetooth remote control with priority input for analogue inputs, the router with WiFi for using the APP, and a USB input so that you can make your own PlayLists. Of course, the establishment will have internet radio per zone or Spotify Connect per zone.

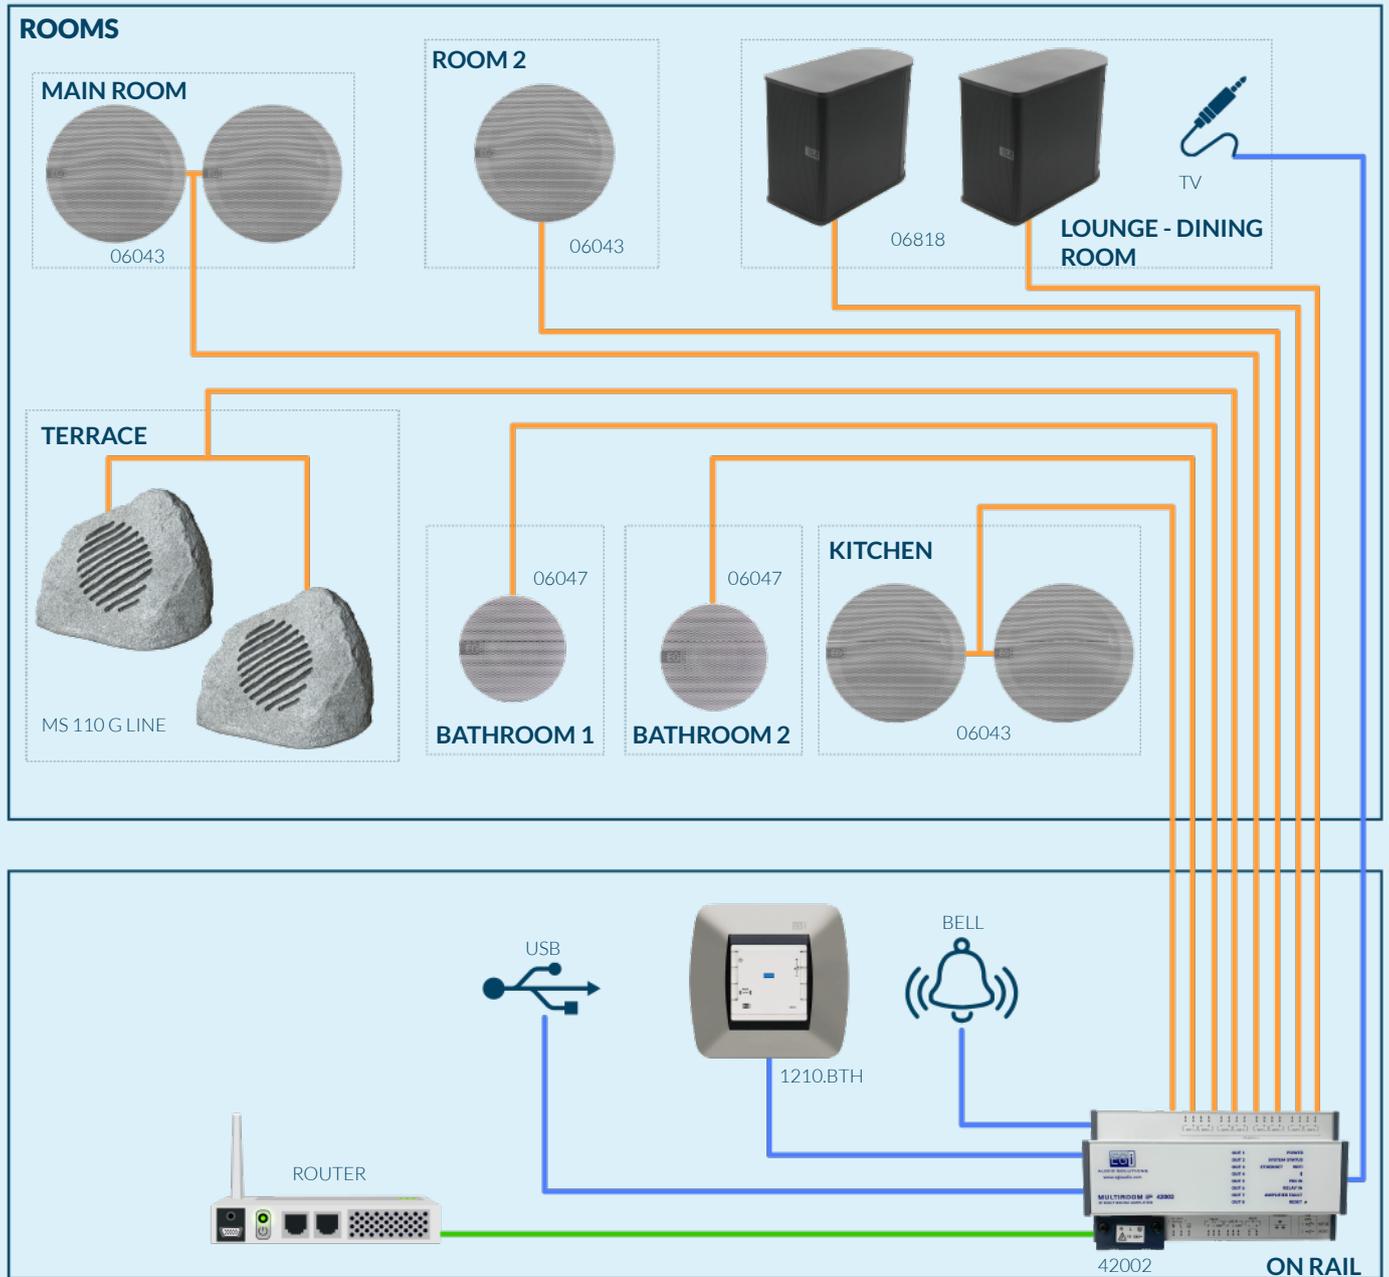

MULTIROOM IP

Example 2 - Installation in a single-family house.

For this example we have used an average single-family house with a kitchen, 2 bedrooms, 2 toilets, living room and a terrace, thus distributing the sound throughout the house.

The TV output of the living room has been connected to the Line IN input, in order to be able to listen to the TV in any zone at any given

moment. It has also been placed a supplementary bluetooth remote control with priority input for analogue inputs, the Router with WiFi to use the APP, and a USB pendrive so that they can make their own PlayLists. Of course they will have internet radio per zone or Spotify Connect per zone.

COMPACT

ALL-IN-ONE SOLUTIONS

Hotels | Retail | Residential | Offices

EGi's **all-in-one solutions** for small businesses and installations allow you to have sound and public address in small installations where you use **public address and environmental sound systems**. Your entire installation in a single unit.

10401

Compact dualvoltage console 2+1 zones, 2x50 W, FM RDS, AUX IN, USB and microphone.

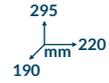

COMPACT

AMPLIFIED CONSOLES

10401

Compact bitension 2+1 zones, 2x50 W, FM RDS, AUX IN, USB and microphone.

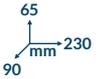

Self-powered 115/230V~ desktop console with 3 zones (2 x 50W + 1 for controls). It has a built-in microphone for zone announcements, music playback via USB, FM/RDS radio tuner, AUX IN and microSD card input for the playback of pre-recorded messages and ding-dongs according to the client. In addition, it allows the volume to be adjusted by zones, memorise stations and play messages in general or by zones.

10403

MiniCompact 1 amplified zone 20 W, 4 Ω expandable, Bluetooth, AUX IN and microphone.

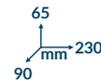

Self-amplified tabletop console of 1 zone of 20W with expandable output type PIN OUT to increase amplification and control to more speakers and points, sounding all in one zone. It has a built-in microphone for announcements, music playback via Bluetooth or AUX input via 3.5mm jack. Selection between the 2 music sources indicated, with separate announcement and music volumes. Automatic Dynamic Loudness equalisation via volume control. With 15 Vdc power supply included as a multi-voltage source between 115/230 V~.

10403.1

MiniCompact 1 zone amplified 20 W, 4 Ω expandable, Bluetooth, AUX IN.

Self-powered 1 Zone 20 W desktop console with expandable output type PIN OUT to increase amplification and control to more speakers and points, sounding all in one zone. Plays only music via Bluetooth or AUX IN via 3.5mm jack. Selection between the 2 music sources indicated, with music volume. Automatic Dynamic Loudness equalisation via volume control. With 15 Vdc power supply included for multivoltage source between 115/230 V~.

COMPACT

ACCESSORIES

05017
Toroidal transformer HQ 50 W, 100 V, 4 Ω (low impedance).

10282
Wireless dB-25 receiver through EGi Wireless audio.
For 10402 and 66XXX

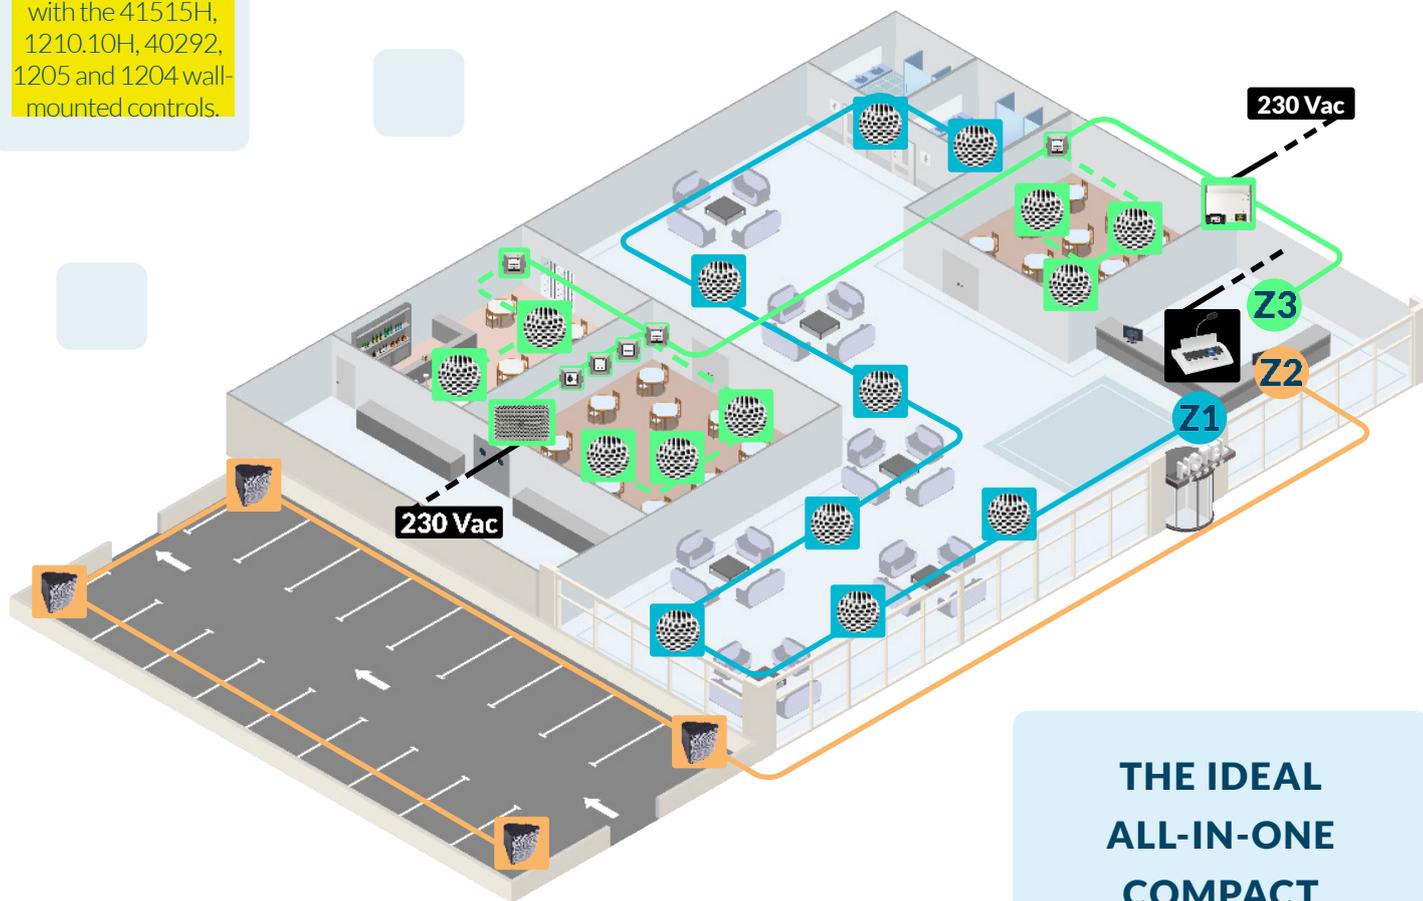

05021
Voltage transformer 230 / 400 V a 115/230 V symmetrical 100VA loose.

10283
Wireless transmitter by dB-25 through EGi Wireless audio.
For 10402 and torres 66XXX

The **Compact** series is **compatible** with the 41515H, 1210.10H, 40292, 1205 and 1204 wall-mounted controls.

THE IDEAL ALL-IN-ONE COMPACT SOLUTION FOR YOUR HOTEL

Example of a simple installation for a hotel sound system in 2 zones: Zone 1 and Zone 2. Optionally, the installation can be extended (Zone 3), incorporating the Millennium series which will allow the possibility of providing general and local background music.

Compact console located at the reception desk, which allows for announcements, individual volume control and incorporates audio sources such as FM/RDS radio, MP3, WAV via USB and AUX input via 3.5mm jack cable.

MOBILE APP

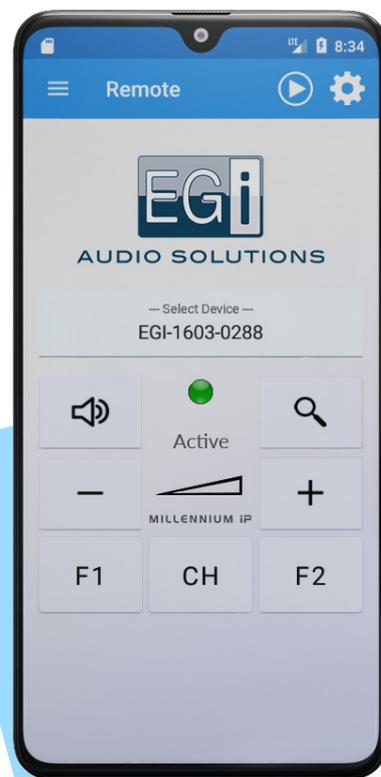

I814

At EGi we have designed and developed a simple and intuitive mobile app. Control the music playback in our modules from your mobile phone, whatever it is (Android or iOS).

Select the device you want your music to play through and adjust the volume to your liking.

This application is compatible with all Millennium IP equipment.

Now available on Google Play and the App Store completely free of charge.

I211

Multi-zone IP paging console with power supply, display, microphone and message recorder.

Make the management from the head office in an easy and simple way using the internet networks of your facilities.

MILLENNIUM IP

DATA NETWORK-BASED SOLUTIONS

Hotels | Hospitals | Shopping Centers | Industria | Restaurantes

Millennium IP allows the **design of distributed public address systems** using an IP LAN or Ethernet network and standard protocols as the communication link. In addition, they allow the system to be used in data networks already installed for other purposes.

INSTALLATION ADVANTAGES

Easy installation

Extends the number of zones (from 1 to more than 100) by adding receiving equipment without the need to modify the existing wiring.

Configuration flexibility

Adjust the installation according to your needs, integrating multiple applications, services and different audio sources.

Create as many channels as you need, always according to the network infrastructure.

Low bandwidth.

Intelligent system

In case of failure or disconnection the system lets you know. In addition, there is no critical failure point because our IP audio system works without a central server.

Free and remote firmware upgrades.

Decentralized system

Place more than one system control center in your installation.

1212

IP control, PoE power supply for remote control of Millennium IP.

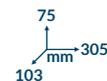

MILLENNIUM IP

IP POWER AMPLIFIERS

Low impedance

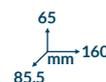

10205
IP audio power amplifier 2x25W or 1x50W in DIN-rail stereo/mono format.

Professional power amplifier with IP connectivity and streaming audio, class D in DIN rail format, high efficiency, 115/230 V~, 2x25 W at 4 Ω minimum, or bridgeable 1x50 W at 2 Ω min. Aluminium format. PIN and audio line inputs via terminal strips. 1 input and output for relay, with working configuration in stereo/mono mode. Output to loudspeakers via plug-in terminal strips, Ethernet LAN connection.

10206
IP audio power amplifier 1x50 W at 2 Ω on DIN mono rail.

Power amplifier with IP connectivity and streaming audio, class D in DIN rail format, high efficiency, 115/230 V~ and 1x50 W audio output at 2 Ω. Aluminium format. PIN and audio line inputs via power strips. One input and output for relay, with mono configuration. Output to loudspeakers via plug-in terminal strips, Ethernet LAN connection and USB input for connection of Pen Drives with music in mp3 and/or WAV format.

100 V Line

1360

IP audio power amplifier 1 zone, 1x240 W, 100 V in 2U rack format.

1361

IP audio power amplifier 1 zone, 1x500 W, 100 V in 2U rack format.

1362

2 zone, 2x120 W, 100 V IP audio power amplifier in 2U rack format.

1363

IP audio power amplifier 2 zones, 2x240 W, 100 V in 2U rack format.

1364

IP audio power amplifier 4 zones, 4x120 W, 100 V in Rack 2U format.

1365

IP audio power amplifier 2 zones, 2x500 W, 100 V in 2U rack format..

IP SOFTWARES

1810

Millennium IP Soft Lite management software.

1812

PC application for event handling between Millennium IP devices.

1813

PC application for music management.

1814

App for iOS and Android. Control the music in our equipment from our mobile phone.

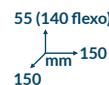

IP CONSOLAS

1211

IP multi-zone paging console with power supply, display, microphone and message recorder.

Announcement console with RJ45 IP connectivity, for multiple audio and message management through Ethernet networks and even through Internet networks. It has a unidirectional Electret microphone for the correct targeting of announcements, it has an integrated loudspeaker for listening to pre-recorded messages or external announcements. It allows the launching of real-time or pre-recorded warnings. Power supply at 15 Vdc standard coaxial connector.

1211.M

IP multi-zone paging console with display, microphone and message recorder. Without power supply.

IP CONTROL

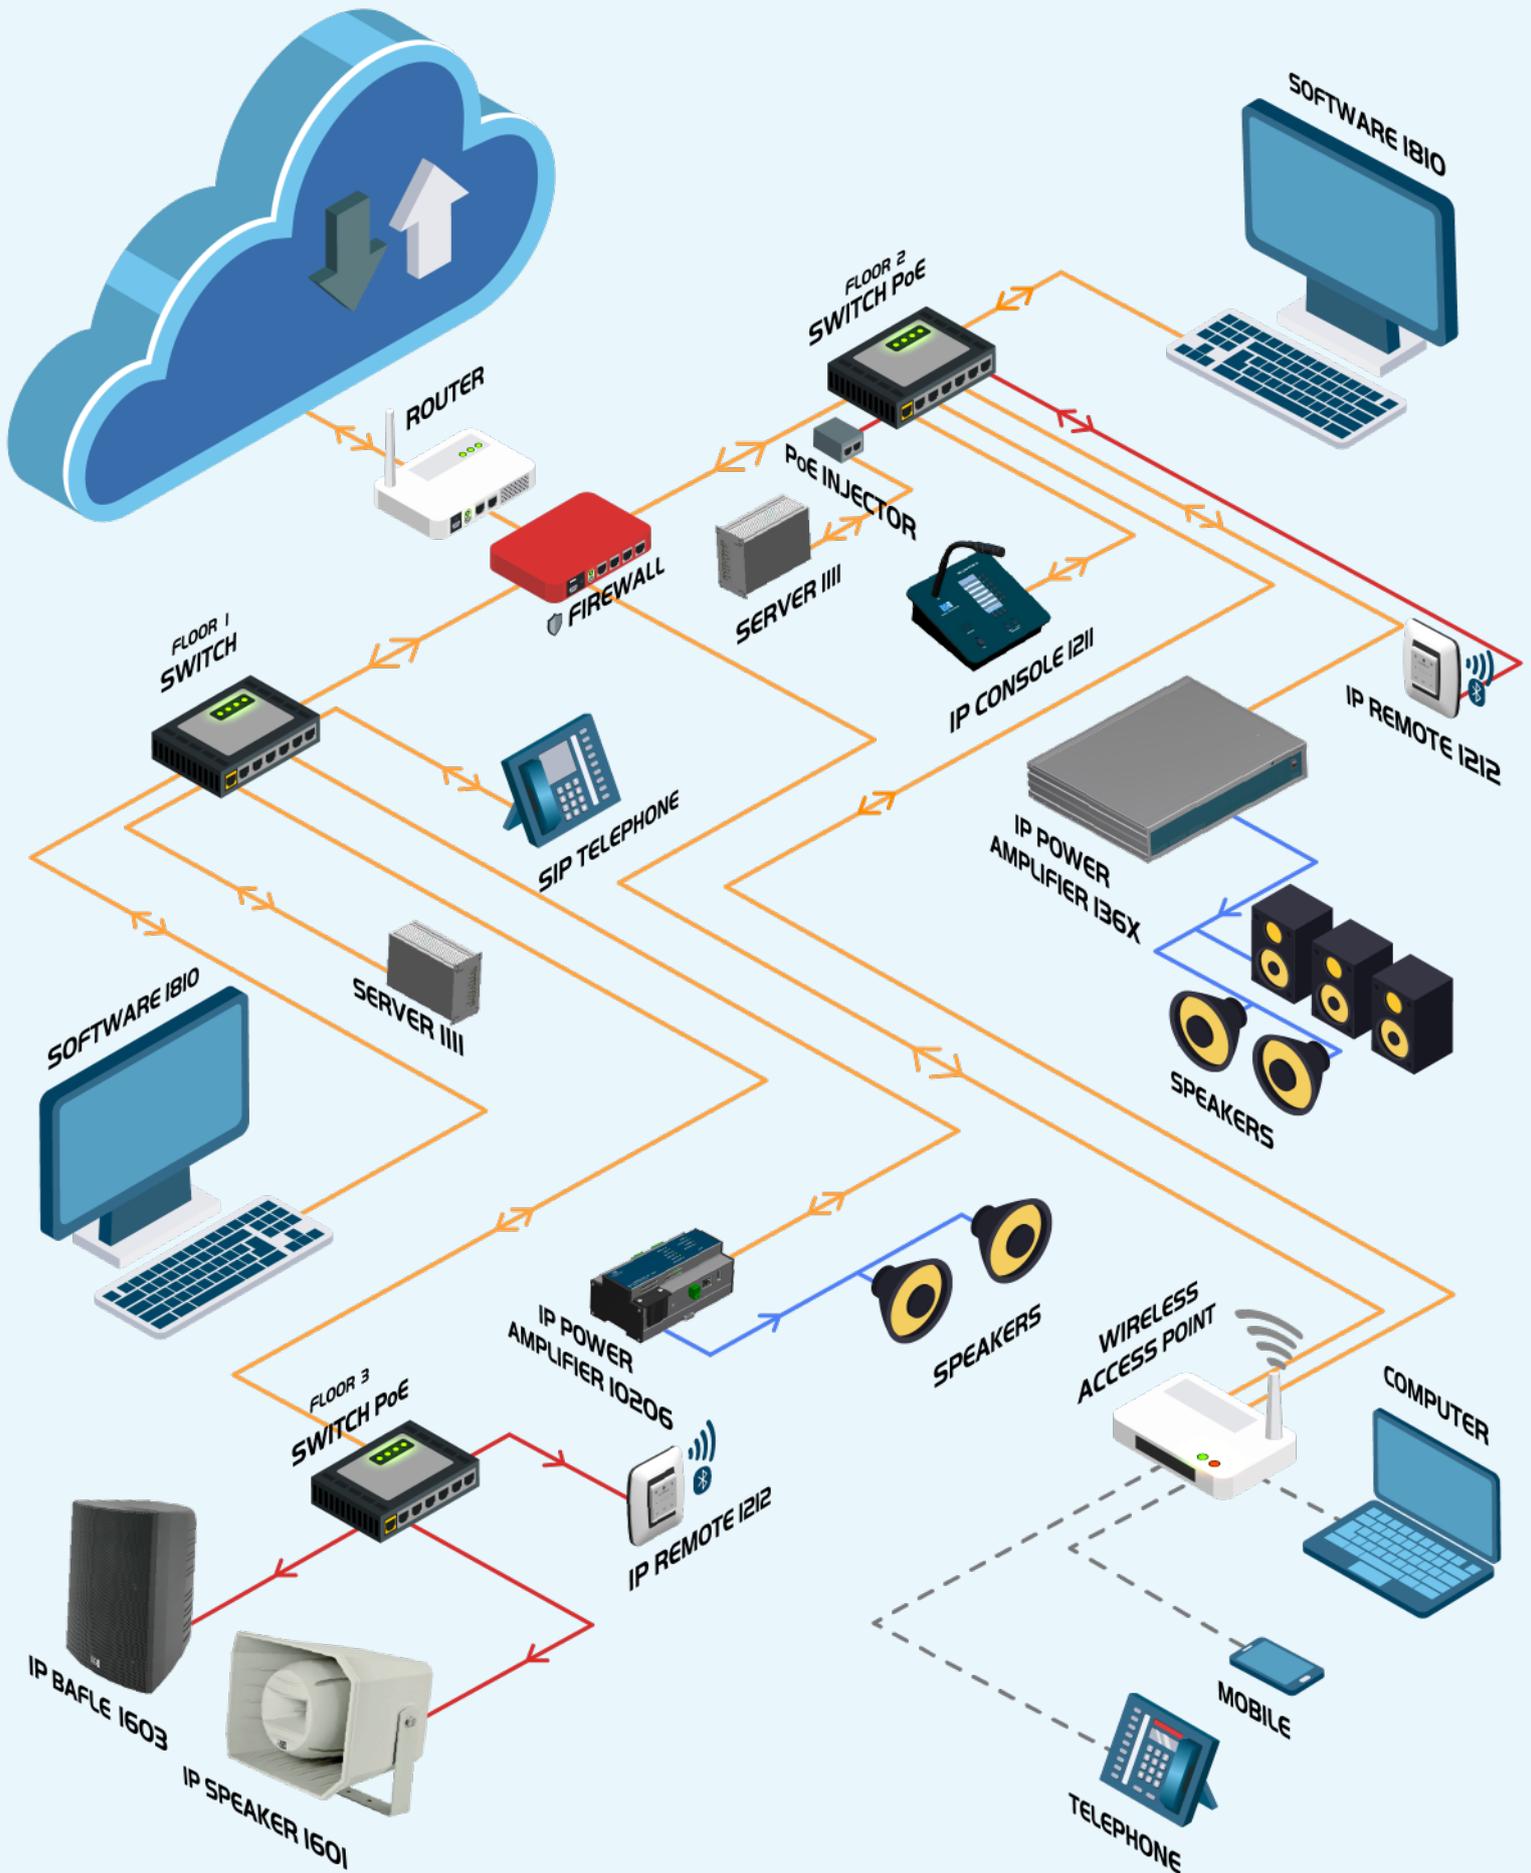

1212

IP control, PoE power supply for remote control of Millennium IP zones.

Touch control with digital keypad, PoE power supply and Bluetooth receiver, for remote control of Millennium IP zones. In universal box format \varnothing 60 mm and white colour. Activates or deactivates the music, raises and lowers the volume, switches between music channels. It has 2 user-programmable function keys (F1 and F2). It has Bluetooth for local music broadcasting to the stage with which the control has been configured and, as it is a Multicast channel, this audio can be sent to all the required zones.

Maximum power	2 W (internal speaker)	2 W (internal speaker)	-
Placement	Tabletop	Tabletop	\varnothing 60 mm box
Color / Finish	Black	Black	White

MILLENNIUM IP

Example 1 - Installation over a data network.

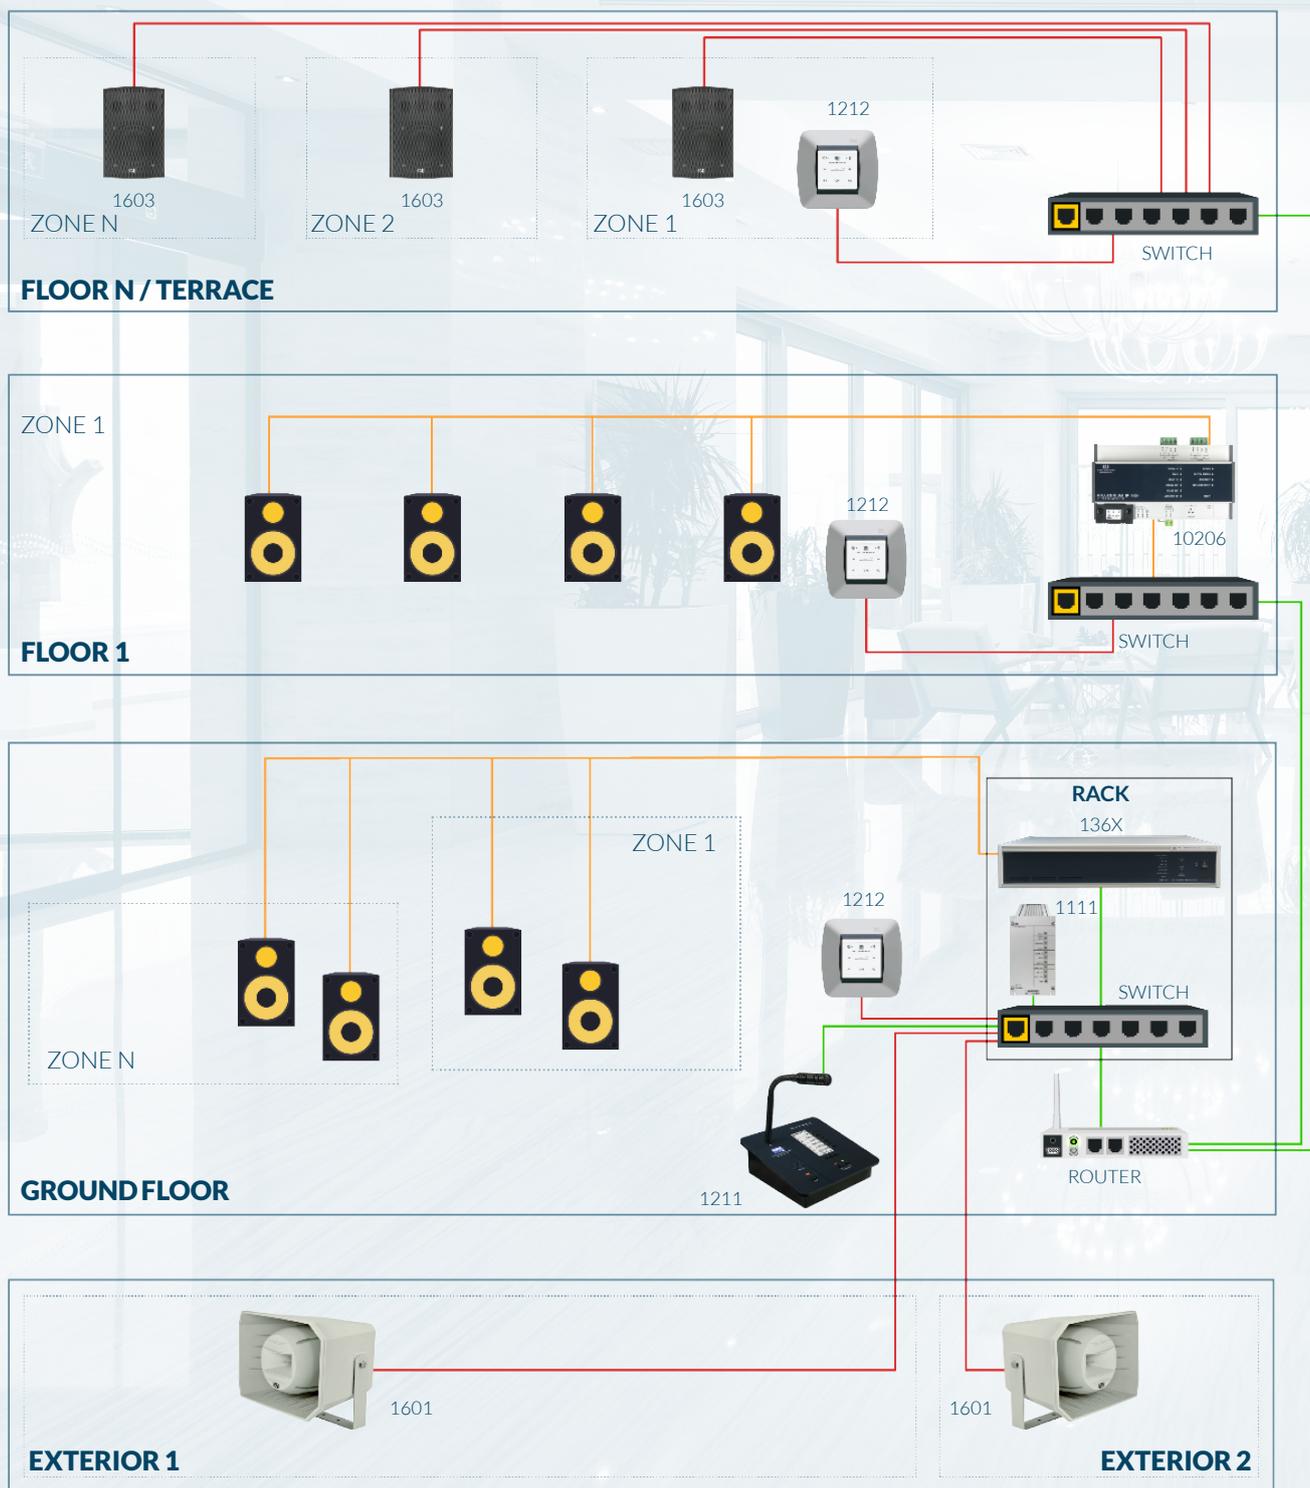

An example of a multi-storey Millennium IP installation can be seen below. A main rack on the “ground floor” can be highlighted connecting the ground floor zones and the outdoor speakers.

On each floor we could find a single rack with a switch and a DIN-rail stage to power the speakers of the floor (“Floor 1”). In this way, we would not have the installation completely centralised

at one point, but each floor is completely centralised at a single independent point’.

Another option would be to connect the different loudspeakers (1 per zone) and the control to a PoE switch (“Floor N / Terrace”).

This example could be valid for a hotel, a school, a shopping centre etc.

— Ethernet network with PoE power supply
 — Red-Black audio cable 2x1.5mm (100V line).
 — Ethernet UTP category 6 network.

MILLENNIUM PRO

DIGITAL CONTROL SOLUTIONS

Hotels | Hospitals | Sports centres | Industry | Restaurants | Retail

Millennium PRO allows for the design of centralised or decentralised PA systems with distribution via a special 9-wire BUS with digital commands and analogue audio with Millennium PRO protocol, for the control and design of installations from 1 zone up to 127.

1202

Alarm and control console for Millennium 127 zones with speaker and microphone with flexo.

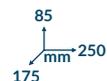

MILLENNIUM PRO

CONTROL CONSOLE

1202

Message and control console for Millennium 127 zones with loudspeaker and microphone.

127 zone audio controller with paging microphone, keypad and display. Controls music, features such as volume, equalisation and automatic messages in each zone or group of zones. Includes 2" and 32 Ω loudspeaker for answering messages. Menu-driven with the aid of a 4-line, 16-character display. Allows programming of the entire installation.

Power supply	15 Vdc
Maximum consumption	200 mA
Frequency response	20 Hz - 17.000 Hz
Placement	Tabletop
Color / Finish	Black with stainless steel cover

MILLENNIUM PRO

CONTROLS AND MODULES

1105.10 / 1105.12
Pre-amplified XLR microphone input base.

Pre-amplified XLR base for local microphone connection to a sound system. Built-in voice compressor to avoid distortion. The microphone can be dynamic (balanced or unbalanced) or electret or condenser (with or without phantom power) or output from the microphone of a wireless microphone receiver.

1106.10 / 1106.12
Input module for auxiliary audio signal with On/Off and volume.

Volume regulator, with RCA auxiliary input for local audio sources (CD, tape deck, wireless microphone...) Withpower switch and pilot light. Incorporates slow signal compressor to avoid distortion. Self-mixing up to 5 units.

1107.10 / 1107.12
On/off and volume control module for 1105 base.

Power button with pilot light. Digital volume control with 80 1 dB steps. Double polarity push button input for manual microphone activation. Self-mixing up to 5 units.

1204.10 / 1204.12
2-channel control amplified 2.5+2.5 W or 5 W, with announcement preference.

2-channel control, 5 W power for connection of 1 to 8 loudspeakers. Digital volume of 80 1 dB steps with loudness. Recognises the number of channels in the installation and adapts its selector to them. Gives priority to announcements.

1205.10 / 1205.12
4-channel control, self-amplified 1 W, 16 Ω, with paging preference.

4-channel control, 1 W power for connection of 1 or 2 speakers. Digital volume with 32 2 dB steps which, if desired, will slowly decrease after 6 hours of operation until it is switched off (hotels). Gives priority to announcements.

CONTROLS AND MODULES

1206.10 / 1206.12

Digital control keypad for local control of amplifiers.

Digital control keypad for up to 4 sound channels. Indicator lights for the selected channel. Combines with any Millennium digital amplifier. Up to 3 can be installed in parallel, in the same zone and to the same amplifier.

1207.10 / 1207.12

Digital control 4-channel amplified 2 W, 8 Ω, paging priority.

4-channel control, 2 W power for connection of up to 4 loudspeakers. Digital volume 80 steps of 1 dB. Configurable as a zone. Controllable from 0801 software or 1202 console. With warning priority.

1208.10

2-zone intercom for connection of several in parallel.

2-zone intercom without amplifier with independent volume adjustment per zone. Selection between internal or external microphone. Several units can be connected in parallel.

1501.10 / 1501.12

Docking station for Millennium console and music sources.

Connection socket for connecting the 1202 controller and music sources. RCA audio input with compressor for connecting an external music source to the sound system. Signal presence indicator light.

VARIOUS MODULES

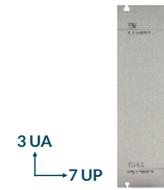

05009

Audio unbalance filter for power amplifiers with signals from 3 V IN to 3 V OUT with +7 Vdc and 500 mV Out.

1707

3 RU rack chassis for placement of modular devices in rack cabinet.

1710.A

Millennium 7 UP rackmount processor cover.

FLUSH AND SURFACE BOXES

1705

Flush box (for 1307.X, 1308.X, 1309.X, 1310.X).

1706

Surface box (for 1307, 1308.X, 1309.X, 1310.X).

CABLES (100 M ROLL)

1507.1LH

9-conductor cable (1x1.5 mm²; 1x1 mm²; 5x0.5 mm²; 2x0.5 mm² - twisted pair). Halogen-free, flame and fire retardant. With 450/750 V sheath and insulation.

1507LH

9-conductor cable (1x1.5 mm²; 1x1 mm²; 5x0.5 mm²; 2x0.5 mm² - twisted pair). Halogen-free, flame and fire retardant. Without sheath and 450/750 V insulation.

CML100V

Bipolar green/orange stranded cable (2x1.5 mm²) halogen-free version, flame retardant/fire retardant. Without sheath. 450/750 V insulation.

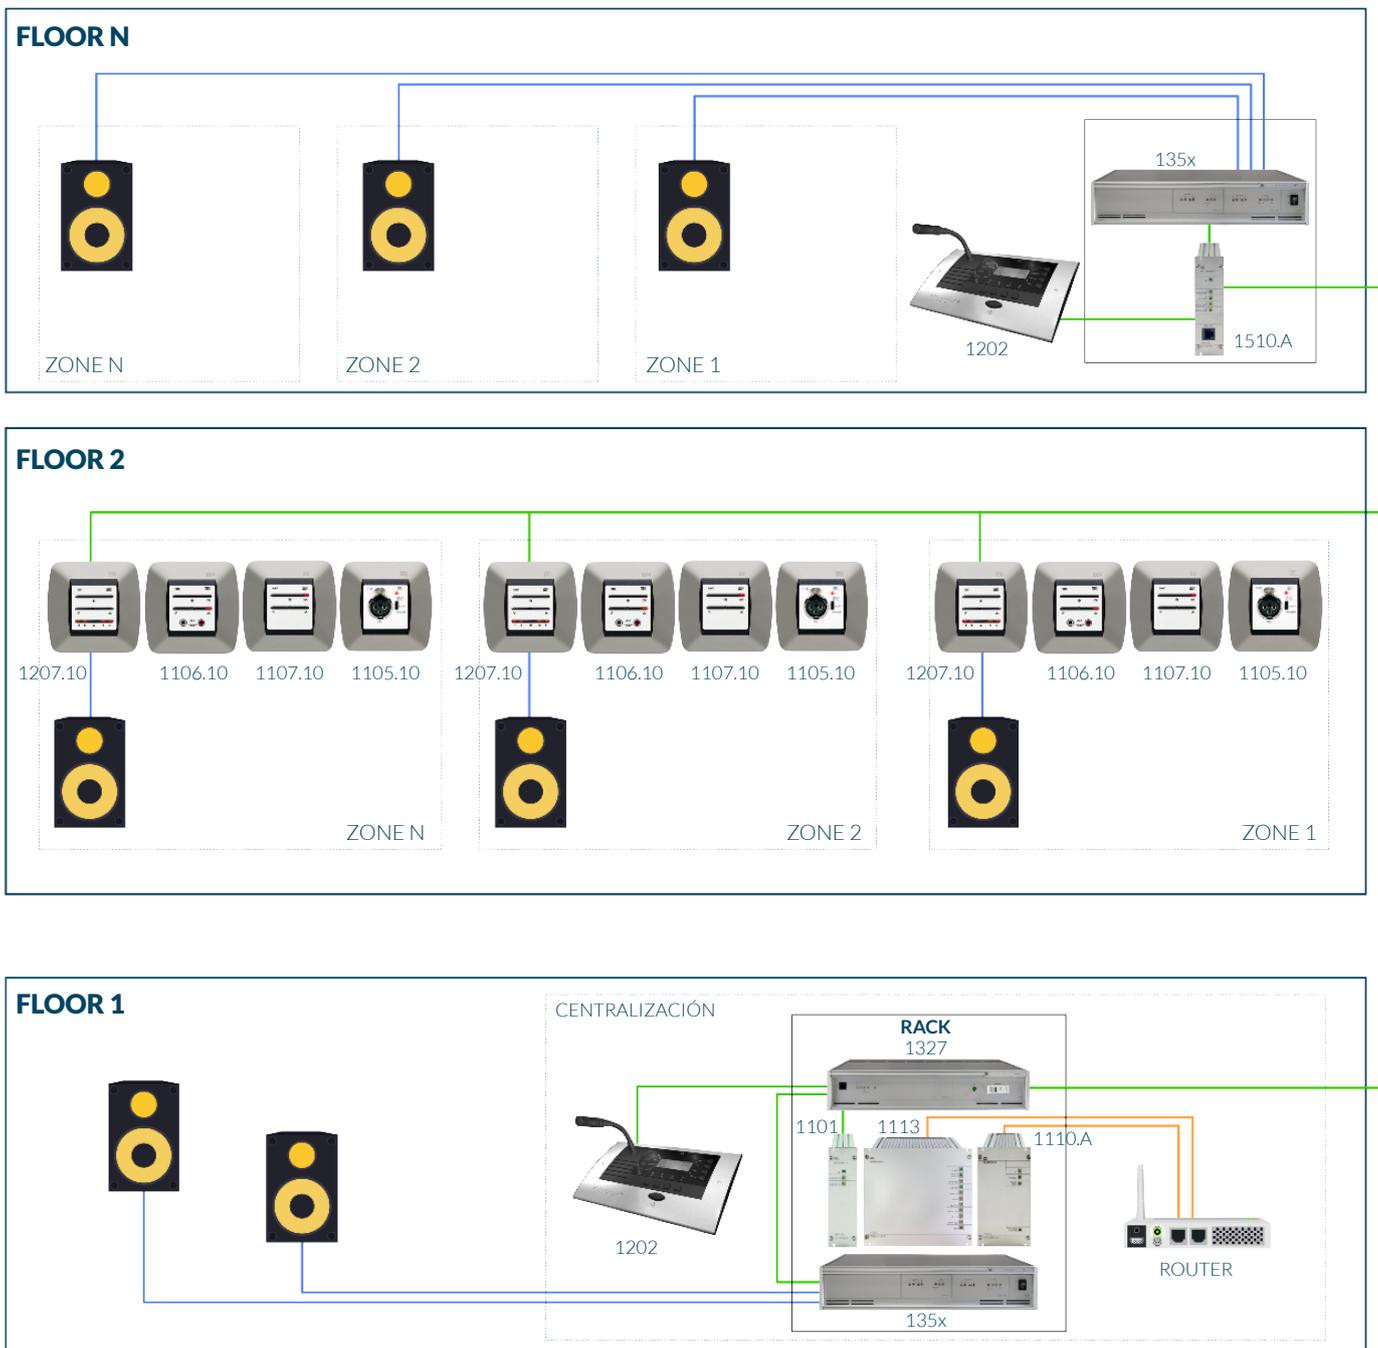

Example

Below is an example of a Millennium PRO installation with an extension thanks to the Millennium IP system.

The most common combination of both systems would be to add an 1113 module in the main rack. In this way, calendars, evacuation or training messages, etc. can be provided.

This example could be used for schools, hotels, fire stations, gymnasiums, etc.

There are many different types of extensions. All of them are possible in consultation with our technical-sales service team.

MILLENNIUM PRO

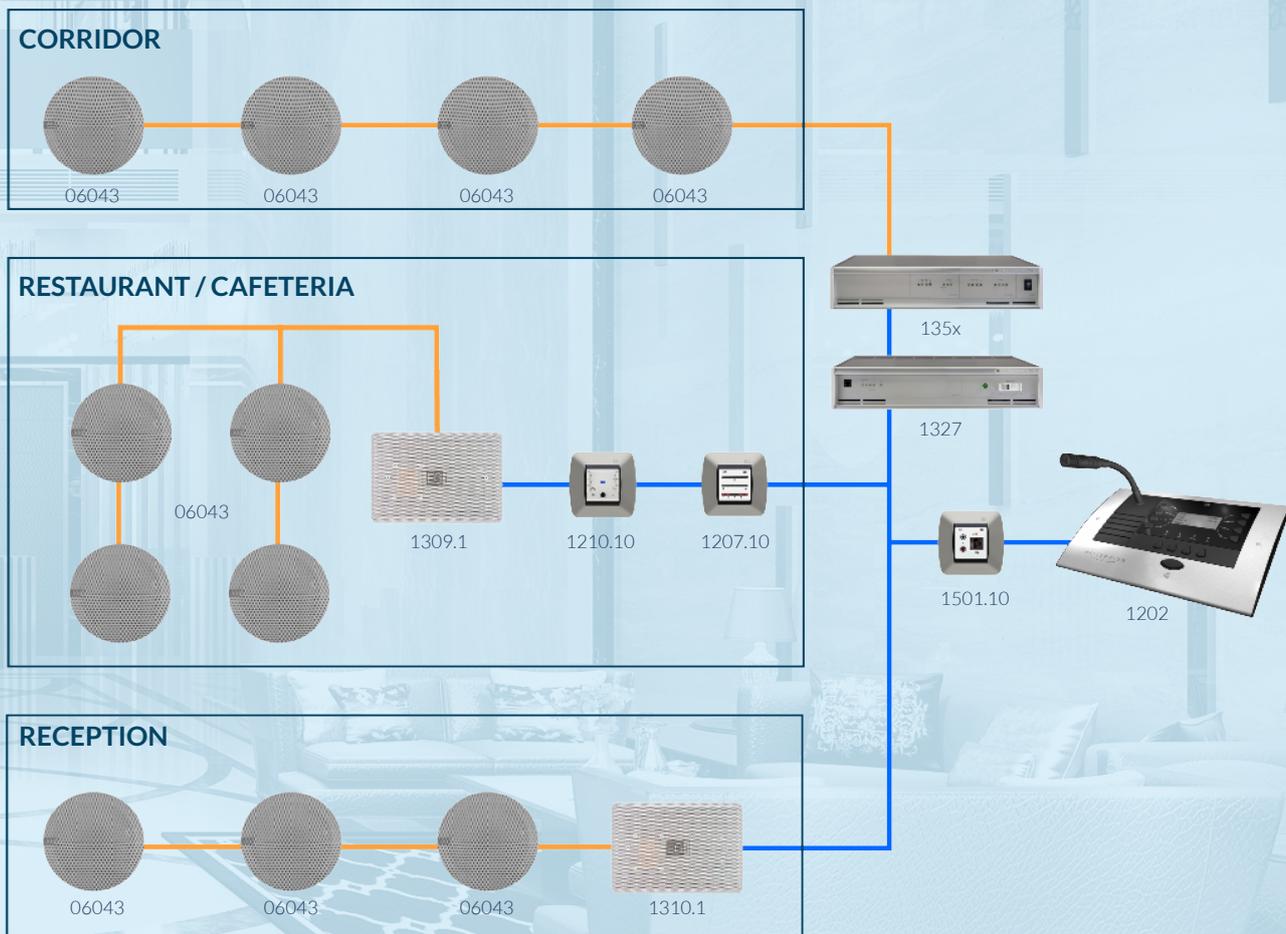

MUSIC TO FEEL GOOD

Common areas, such as corridors, reception, cafés and restaurants in hotels, residences, companies...

These are places where sound quality is a differential element, so our loudspeakers and Bluetooth® modules provide the right power to create different atmospheres for every occasion.

EGi Audio Solutions offers the **Millennium PRO centralised system** which allows **mixed installation sound** and PA control from one control point or remotely by **combining it with Millennium IP** audio modules.

Ejemplo

Installation of the Millennium line for common areas. From the 1202 console, messages can be sent to all areas. In the case of restaurants or cafeterias, the 1207.10 and 1210.15 or 1210.10H controls are added to personalise the music according to the ambience of each room. Both controls have priority of warnings.

As can be seen in the aisles, there is also the option of connecting the loudspeakers to a power amplifier, which would be centralised in a rack.

You can put as many microphones as you need.

100 V LINE

SOLUTIONS FOR LARGE INSTALLATIONS

Industry | Cult centers | Large Public Address Installations

To service large installations, EGi **manufactures** and markets special materials for industrial public address systems.

In addition, our **technical office** is at your disposal to estimate, calculate and offer you the start-up of your project.

10303

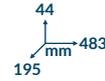

Microphone console for 6 zones of the 10302.

PROFESSIONAL ESCENIC

PROFESSIONAL AUDIO SOLUTIONS

Sports centres | Auditoriums | Nightclubs | Bars | Restaurants

Escenic is an excellent solution for sound reinforcement in spaces where the power and quality of professional audio must be higher than that provided by a conventional sound system.

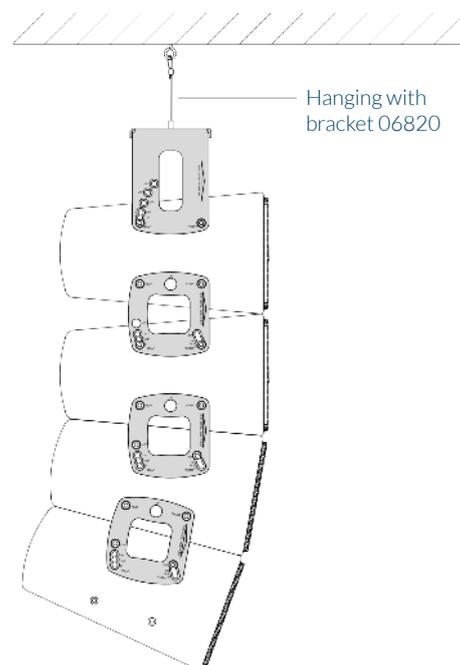

Moreover, the products of this series can be used as a complement to installations made with the Millennium series.

- High-fidelity reproduction, with professional sound power and sound pressure.
- 5" mid-woofer.
- High-performance ribbon tweeter.
- Ideal for sound reinforcement in pubs, bars with live music, restaurants, theatres, terraces and event halls.
- Stackable in formations of 2, 4, 6, 8 and 10 line array loudspeakers in horizontal position.
- It can be powered up to 150 W RMS or 300 W of music program.

SECURA PRIMMA

CARE SYSTEM

Hospitals | Residential homes | Day care centres | Assisted bathrooms | Refuge areas

Its functions, simplicity of use and ease of installation make **Secura Primma a competitive and robust solution** for patient-nurse communication in hospital and care environments. It can also be used for intercommunication between assisted toilets and refuge areas, with centralisation of the system.

5211

Room signalling module

SECURA PRIMMA

CENTRALISATION

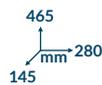

5103
Wall module for bed push button.

Wall module for bed push button. Installation in a 60x60 mm universal box. Works in combination with the EGI 5202 bed push button. With jack connector to reduce the possibility of accidental start-up. In case the bed push button is started, it generates an alarm. Parallel connection with EGI 5301 terminal, more than 1 per room can be installed.

5303
Central plant.

Allows to receive calls from the rooms it controls and establishes audio communication with the rooms. Designed to be an independent element on each floor of the building. Calls can be forwarded from any control panel. The control panel displays all calls permanently and shows them on its screen.

5803
IP plant interface.

The floor interface is the device that links a group of remote room terminals to their respective floor station. It also has the function of separating the audio signal and links the BUSES when the control panel is bypassed.

5804
Regenerador de señales del bus.

The regenerator is used to restore the system BUS signals. As a general rule, one will be placed before each plant dispersion BUS, between the general distribution BUS and the plant interface. This way we can isolate the power supply and regenerate the data and audio bus.

5806
Interface module for connecting Secura Primma to analogue PBX telephone exchanges.

This module allows verbal communication from a telephone connected to an analogue extension of the same PBX with the rooms of the installation. Main functions: Answering calls from the switchboard from a telephone; Making calls to a room from a telephone.

ROOM DEVICES

5104
Microphone + preamplifier. Box ø 60 mm.

Microphone with preamplifier for installation in a universal box. Works in combination with the EGi G26U/16 loudspeaker or any 16 Ω loudspeaker from the EGi range, it is recommended not to place two or more close together, as in Full-Duplex mode it can produce couplings. Allows hands-free communication between the resident and care staff.

ROOM DEVICES

5201 Wall module for bathroom handle. Box ø 60 mm.

Wall module for installation in universal box. Works in combination with the EGI 5701 bathroom handle.

5202 Bed push button with 2.2 m cable.

Ergonomically designed bedside push button. With phosphorescent ring for easy identification at night. Connects to the EGI 5103 module. It has an acoustic alarm signal with each press and an anti-strangulation device. If it is pulled out of its general base, it makes an alarm call to the control panel.

5204 Presence of medical personnel pushbutton.

This button indicates the presence of assistance personnel in the installation, from common areas or specific rooms. To be installed in universal box. Only compatible with trim 07043.

5211 Room signalling module. Box ø 60 mm.

Module in a universal box for the indication of the state of attention in rooms of residences, hospitals or similar. It operates at 230V~ and is powered by 2 red and green indicator LEDs of 1 W each.

5503 Remote terminal for 1 or 2 rooms.

Manager of two single rooms or two double rooms or one room with three beds. Connects to the system via a 6-wire BUS (power, data and audio), such as 1505.1.

Designed for installation on DIN rail occupying 7 units, housed inside a standard enclosure. Equipped with self-plug-in connectors for easy installation. It should be housed as close as possible to the rooms on which it operates.

5701 Bathroom handle.

Ergonomic design. Incorporates 2 m long cable with anti-strangulation device. With ring phosphorescent for easy identification at night. Connects to the EGI 5201 module.

	5104	5201	5204	5211	5503

SECURA PRIMMA

BUS CABLE

5504
6-wire stranded cable 750 V halogen-free without sheath.

ASSISTED BATHING DIAGRAM

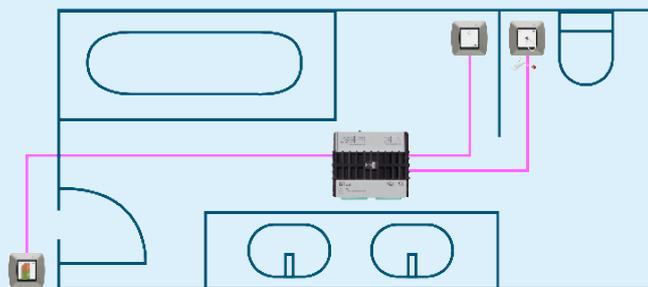

The Secura Primma line of EGi Audio Solutions complies with the DB-SUA standard of the Technical Building Code, regarding safety against the risk of entrapment in enclosures. This regulation has been mandatory since 2017.

The regulation establishes in Section SUA 3 on Safety against the risk of entrapment in enclosures, in point 2, that “in areas of public use, accessible toilets and accessible changing cabins shall have an easily accessible device inside them, which shall be easily accessible

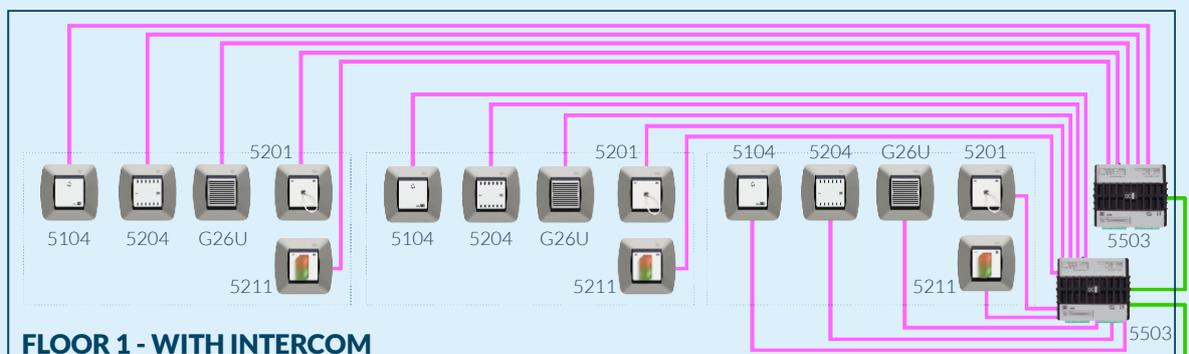

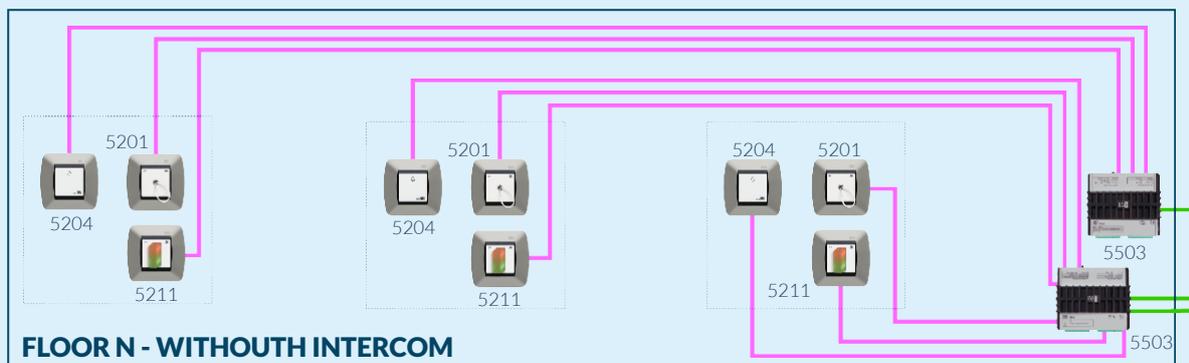

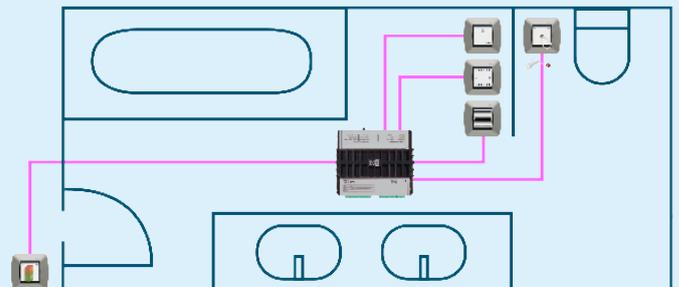

to the public by which a call for assistance is transmitted which is perceptible from a control point and which allows the user to verify that his call has been received, or which is perceptible from a frequent passage of persons’.

In addition, at EGi we have two wall modules for intercommunication with the central station. In this case, if the user needs help, he can specify his need via microphone and loudspeaker.

WITHOUT INTERCOM

WITH INTERCOM

REFUGE ZONE DIAGRAM

The **Secura Primma** line **also complies with the DB-SI standard of the Technical Building Code** with regard to communication with refuge areas.

In this way, having installed the modules, the loudspeaker and the microphone, the people located in the refuge area can contact the person in charge of the central console (normally reception) in order to be able to report the following information any rele-

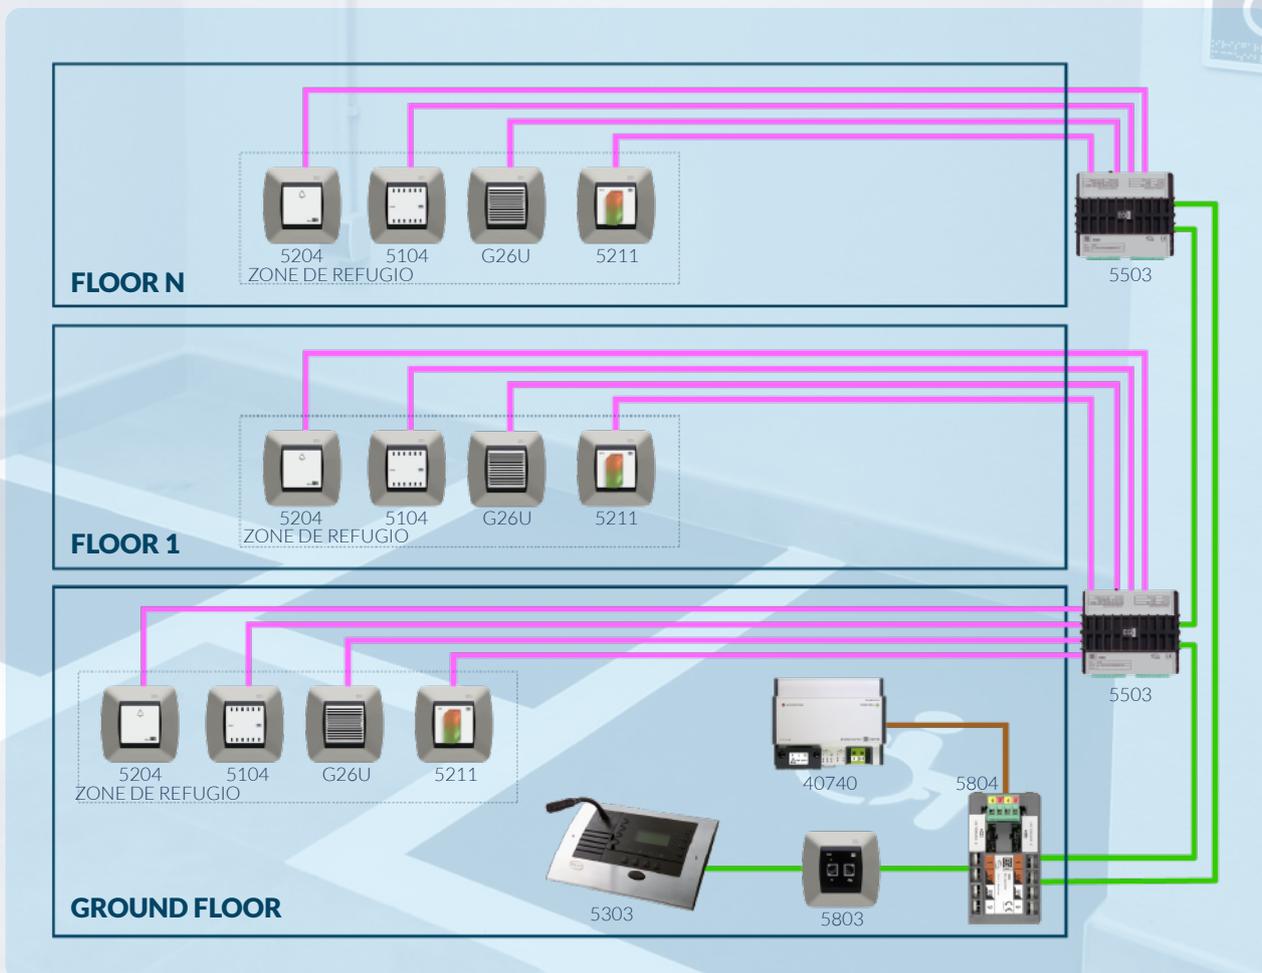

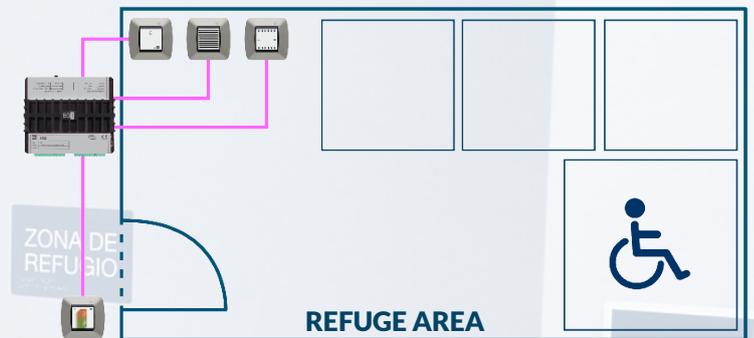

vant information (number of people, casualties, etc.) to whoever is relevant.

As shown in the bathroom and shelter diagrams, each remote terminal -5503- can be connected to up to two zones, connecting the other devices one by one.

In the case of refuge areas, the bathing strip -5201 + 5701- would not be necessary.

SIGN INDICATING A REFUGE AREA

ADAPTERS AND TRIMS

Todos nuestros módulos y mandos son compatibles con la mayoría de fabricantes de mecanismos del mercado.

1802/XX

Embellecedor EGi de 2 módulos.

1801/XX

Embellecedor EGi de 1 módulo.

07027

Embellecedor para caja V13D.

ADAPTERS AND TRIMS

FOR EGI UNIVERSAL BOX CONTROLS

1802/BN

Snow white

1802/NE

Black

1802/PL

Silver

EGi trim 2 module.

1801/BN

Snow white

1801/NE

Black

1801/PL

Silver

EGi trim 1 module.

07027

Stainless steel trim for box V13D.

INSTALLATION ACCESSORIES

JAN2662

Linkable flush box.

008258

Ferrite cable 10mm 348 Ω / 100 MHz.

ADAPTATIONS OF OTHER BRANDS

0702.10

Intermediate frame Legrand® Galea and Galea Life series. White.

07037 / 07042

Bticino® Living-Light adaptation to EGi controls. Anthracite / White.

0704.10 / 0704.12

Adapter (chassis and trim) from EGi modules to EGi pre-installations. White / Black.

07043

Niessen Zenit trim frame white colour only for 5204.

07046

EGi 2-module adapter. For 1802 trims or compatible adaptations, to central box type V11F or W11F.

0705.10

Intermediate frame Legrand® Galea and Galea Life series. White.

0707.10

Adapter bushing for Eunea® Single series. White / Black.

0711.10

Adapter bushing for Eunea® Unique Plus and Top series. White / Black.

0715

Adaptation of EGi control to Bticino® Axolute series.

W27S/BN / W27S/GR / W27S/MF / W27S/NE

Intermediate frame series Simon® 27/82/88 and various. Snow white / Grey / Ivory white / Black. Snow white / Grey / Ivory white / Black

W75S/30

Intermediate frame Simon® series. Snow white.

WEVG/27

Intermediate frame Gira® Event series. White.

WEVG/28

Intermediate frame Gira® Event series. Anthracite.

SERVICES

00004

Commissioning for max. 30 teams and max. 200km distance, 1 technician.

00005

Commissioning for min. 30 teams and min. 200 km distance, 1 technician.

00007

Technical assistance for max. 30 teams and max. 200km distance, 1-2 technicians.

00008

Technical assistance for min. 30 teams and min. 200km distance, 1-2 technicians.

00015

Training course given by EGi technician.

00017

Activity, process or customisation and/or modification of customised EGi product.

00019

Customised configuration of EGi equipment for clients, with the option of programming.

0002

Rack cabinet mounting 0-20ua.

00020

Remote technical support via telephone or pc internet connection (1h/Ud.).

0003

Mounting and connection of equipment in a 19" rack cabinet from 21 to 40 units.

002989

Mechanisation of adaptations.

Contact us and we will help you to make your sound project a reality.

EGi's team is specialised in providing audio solutions for hotels, hospitals, residences, homes, factories, supermarkets, shopping centres, schools... **Our technical department works closely with clients to meet the specifications and needs of each project.**

GENERAL CONDITIONS OF SALE

All our sales are handled under the following terms and conditions:

Shipping/delivery times are given as an indication only, unless expressly confirmed. Delays in deliveries shall not be tolerated under any circumstances, justify a claim for compensation unless otherwise agreed between the parties.

Prices and payment conditions

Late payment or non-payment of the invoice will automatically lead to the suspension of deliveries and may even lead to the immediate claiming of the entire unpaid debt.

The non-payment of an invoice shall incur the bank charges incurred, as well as a late payment interest of 1.5% per month. Rebates, special discounts or similar shall be automatically cancelled.

Reservation of title

The goods sold by EGi shall remain the property of the company until the invoice covering the sale of the goods has been paid in full. EGi reserves the right to demand immediate restitution of the materials subject to an unpaid invoice irrespective of other possible legal actions.

Returns and exchanges

All returns must be previously authorised by EGi. [See the Returns and Exchanges Policy.](#)

Transport

As a general rule, orders are shipped carriage paid. See table at the bottom of the page "Transport costs" to find out the order value free of postage depending on destination.

The transport company is responsible for any possible incidents such as knocks, loss of packages, etc. In case of receiving the material with any visible anomaly or lack of packages, it is essential to indicate it on the receipt that is signed and stamped to the carrier. In turn, these or any other incident occurring during transport will be indicated to EGi within a period of less than 24 hours.

Guarantee

EGi guarantees its products against any manufacturing defect affecting their operation for 36 months from the date of purchase. [See Warranty Policy.](#)

Repairs

The shipment of the products for repair will be made through any EGi distributor store. [See Repair Policy.](#)

PRICES PVR
VAT not included.

ELECTROACÚSTICA GENERAL IBÉRICA S.A. reserves the right to modify the prices of this price list without prior notice, references, units per package or characteristics of any manufactured product if technical improvements, regulations or construction logistics make this advisable.

EFFECTIVENESS: This price update will come into effect on 1 January 2023, overriding the prices of all previous lists.
